Briefly describes the contents of books that explain specific skills and techniques in fields, such as business, graphics, health, and manufacturing.

Students and the Armed Forces New York, N.Y. : Neal-Schuman Publishers, 1981-c1984.

Over 2,800 total pages ... INTRODUCTION Today ' s operational environment presents threats the Army has not faced in nearly 20 years. Against peer competitors, the joint force may face air parity or even localized enemy air overmatch, challenging the assumption of air superiority the joint force has held since the Korean War. This will make maneuver forces vulnerable to air attack by fixed- and rotary-wing aircraft, unmanned aircraft systems, and cruise missiles. Maneuver forces lack capacity and capability to address these threats and the Army requires a speedy response. Stinger missiles provide a key capability for maneuver forces to defend themselves from aerial observation and attack. However, without direct involvement from senior brigade combat team leaders and effective leader training, these missiles will become dead weight at best or a fratricide in waiting at worst. Units must plan effectively to utilize this capability and ensure it ties directly to their scheme of maneuver as opposed to simply task-organizing one Stinger team per company. Just a SAMPLE of the CONTENTS CALL HANDBOOK NO. 18-16 Maneuver Leader ' s Guide to Stinger - Lessons and Best Practices (2018) INTRODUCTION TO MANPORTABLE (Stinger) AIR DEFENSE WEAPON SYSTEM - SUBCOURSE NO. NSN Without Winch, 2320-01-050-2084 ... NSN with WinchMeeting Ghanaian farmers' demand for a full range of mechanization services

Rising labor costs associated with increased rural-to-urban migration have compelled Ghanaian farmers to increase the use of tractors and other agricultural machines to conduct farming operations in the country (Diao et al. 2014). The adoption of these mechanical technologies is consistent with the tendency among Ghanaian farmers to save labor, rather than embrace practices that create additional labor needs (Houssou et al. 2016). Tractor use is concentrated on plowing and other tillage operations primarily (Houssou et al. 2013), but the supply of tractor services is inadequate. Earlier research estimated that plowing services represent 90 percent of the revenues of tractor service providers (Houssou et al. 2013). Both public and private supply of plowing services may have contributed to an expansion of the area under cultivation in Ghana, thereby exacerbating labor bottlenecks in post-tillage field operations for many farmers.
