This unique coursebook attempts to recreate for law students the experience that lawyers have when analyzing the procedural

issues involved in the investigatory phase of a criminal case. This approach not only enhances learning but also makes learning enjoyable since students get to play lawyer. At the outset of each chapter, a complex problem is presented in the form of a memo to a law clerk working in a variety of settings (reporting to a public defender, prosecutor, judge or private criminal defense attorney). The problem is followed by the research tools--relevant cases and statutes--necessary to solve the problem. Notes follow many cases, suggesting to students how the cases might be used to analyze the problem. They also contain summaries of recent cases which may give students a broader perspective on how courts are handling the issues raised by the main cases. This book focuses on criminal procedure under the United States Constitution. Cases are edited sparingly, and many dissents and concurring opinions are included. The cases are presented in chronological order within a topic so that students can see how doctrines or laws developed historically. The eBook versions of this title feature links to Lexis Advance for further legal research options.

The story of the four-wheel-drive tractors
built by Steiger, International Harvester,
Case, and Case IH is told in dramatic
fashion in this authoritative guide.
Starting with the development of early four-
wheel-drive systems at International
Harvester, the book traces the evolution and
design some of the most powerful and capable
tractors of the twentieth century. With

fresh detail on the 4300, 4100, Steiger-built
IH tractors, and the 2+2 tractors including
the Super 70 series, the book offers
prototype drawings of several
models--including the complete story of the
never-before-published Magnum 2+2-- as well
as inside stories and backroom drama that is
a must for any enthusiast for farm history
or tractors. Learn the complete story of
Steiger tractors, which were originally
designed and built in the barn of John,
Douglass, and Maurice Steiger located near
Red Lake Falls, Minnesota. Containing
interviews with more than 50 of the people
who built Steiger from its humble origin to
a world leader, the book traces the
evolution of the lime green Steigers in
engrossing detail. The book also covers the
J.I. Case 4WD line in great detail. In
addition, the book tells the story of how
each of these significant players in the
industry combined under one banner
and--together--created one of the current
industry-leading technologies, the Quadtrac.
The modern evolution of the Steigers and the
introduction of the STX Series (and more)
also receive in-depth coverage. The same
team that created the award-winning books

Red Tractors 1958-2013 and Red Combines 1915-2015 created this book, and notable new contributors include Sherry Schaefer (editor of Heritage Iron magazine) and noted historian Jim Allen. Contributors include Sherry Schaefer, Oscar H. Will III, Jim Allen, Kenneth Updike, Todd Markle, Gregg Montgomery, Guy Fay, Martin Rickatson, Sarah Tomac, Matthias Buschmann, Jean Cointe, Michael Osweiler, and Johann Dittmer.

United States Reports

Paradigms of AI Programming is the first text to teach advanced Common Lisp techniques in the context of building major AI systems. By reconstructing authentic, complex AI programs using state-of-the-art Common Lisp, the book teaches students and professionals how to build and debug robust practical programs, while demonstrating superior programming style and important AI concepts. The author strongly emphasizes the practical performance issues involved in writing real working programs of significant size. Chapters on troubleshooting and efficiency are included, along with a discussion of the fundamentals of object-oriented programming and a description of the main CLOS functions. This volume is an excellent text for a course on AI programming, a useful supplement for general AI courses and

an indispensable reference for the professional programmer.

Illustrated Mission Furniture Catalog, 1912-13

Reprint of actual home furnishings catalog from the height of the popularity of Mission design, illustrating and describing 400 items, many designed to be shipped knocked-down for reassembly at home.

Popular Mechanics

This book continues to reflect our experience that topics once considered too advanced can be taught in the first course. The text addresses metalanguages explicitly as the formal means of specifying programming language syntax.
