Court-martial Reports Jones & Bartlett Learning

This unique coursebook attempts to recreate for law students the experience that lawyers have when analyzing the procedural issues involved in the investigatory phase of a criminal case. This approach not only enhances learning but also makes learning enjoyable since students get to play lawyer. At the outset of each chapter, a complex problem is presented in the form of a memo to a law clerk working in a variety of settings (reporting to a public defender, prosecutor, judge or private criminal defense attorney). The problem is followed by the research tools--relevant cases and statutes--necessary to solve the problem. Notes follow many cases, suggesting to students how the cases might be used to analyze the problem. They also contain summaries of recent cases which may give students a broader perspective on how courts are handling the issues raised by the main cases. This book focuses on criminal procedure under the United States Constitution. Cases are edited sparingly, and many dissents and concurring opinions are included. The cases are presented in chronological order within a topic so that students can see how doctrines or laws developed historically. The eBook versions of this title feature links to Lexis Advance for further legal research options.

Paradigms of AI Programming is the first text to teach advanced Common Lisp techniques in the context of building major AI systems. By reconstructing authentic, complex AI programs using state-of-the-art Common Lisp, the book teaches students and professionals how to build and debug robust practical programs, while demonstrating superior programming style and important AI concepts. The author strongly emphasizes the practical performance issues involved in writing real working programs of significant size. Chapters on troubleshooting and efficiency are included, along with a discussion of the fundamentals of object-oriented programming and a description of the main CLOS functions. This volume is an excellent text for a course on AI programming, a useful supplement for general AI courses and an indispensable reference for the professional programmer.

The story of the four-wheel-drive tractors built by Steiger, International Harvester, Case, and Case IH is told in dramatic fashion in this authoritative guide. Starting with the development of early four-wheel-drive systems at International Harvester, the book traces the evolution and design some of the most powerful and capable tractors of the twentieth century. With fresh detail on the 4300, 4100, Steiger-built IH tractors, and the 2+2 tractors including the Super 70 series, the book offers prototype drawings of several models--including the complete story of the never-before-published Magnum 2+2-- as well as inside stories and backroom drama that is a must for any enthusiast for farm history or tractors. Learn the complete story of Steiger tractors, which were originally designed and built in the barn of John, Douglass, and Maurice Steiger located near Red Lake Falls, Minnesota. Containing interviews with more than 50 of the people who built Steiger from its humble origin to a world leader, the book traces the evolution of the lime green Steigers in engrossing detail. The book also covers the J.I. Case 4WD line in great detail. In addition, the book tells the story of how each of these significant players in the industry combined under one banner and--together--created one of the current industry-leading technologies, the Quadtrac. The modern evolution of the Steigers and the introduction of the STX Series (and more) also receive in-depth coverage. The same team that created the award-winning books *Red Tractors 1958-2013* and *Red Combines 1915-2015*
