"Providing a new and illuminating look at 27 women who've changed the world, *Dead Feminists* ties these historical women and the challenges they faced into the most important issues of today.

Based on the cult-following limited edition *Dead Feminists* letterpress poster series by illustrator Chandler O'Leary and letterpress artist Jessica Spring, the book combines new art and lettering, archival photographs and

ephemera, and revisits the original poster to tell each woman's story. Each chapter is a call to action (Protect, Make, Grow, Teach, Lead, Tell, Share, Play), and shows how the women exemplified that quality in their own ways. This book takes feminist inspiration to a new level of artistry and shows how ordinary and extraordinary women have made a difference throughout history (and how you can too!)"--

"Perhaps because major Victorians like Thomas Carlyle and Matthew Arnold proscribed Romantic melancholy as morbidly diseased and unsuitable for poetic

---

expression, critics have neglected or understated the central importance of melancholy in Victorian poetry. Allegories of One's Own Mind re-directs our attention to a mode that Arnold was rejecting as morbid but also acknowledging when he disparaged the widely current idea that the highest ambition of poetry should be to present an allegory of the poet's own mind. This book shows how early Victorian poets suffered from and railed against what they perceived to be a "disabling post-Wordsworthian melancholy" - we might refer to it as depression - and yet benefited from this self-absorbed or love-obsessed state, which ironically made them more productive."--BOOK JACKET.

By nature, art journaling is a private activity. But when Dawn Sokol 's first book, 1000 Artist Journal Pages, broke the fourth wall and shared the work of artists all over North America and parts of Europe, it created a ripple of inspiration throughout the art journaling community. In this much-anticipated follow-up, Sokol features more than 1,000 new, captivating pages, this time—by popular demand—from artists across the globe. Lists of techniques and materials used for each page, plus behind-the-scenes interviews, give readers a glimpse inside the minds of new and

The English language is a battlefield. Since the age of Shakespeare, arguments over correct usage have been bitter, and have always really been about contesting values-morality, politics, and class. The Language Wars examines the present state of the conflict, its history, and its future. Above all, it uses the past as a way of

illuminating the present. Moving chronologically, the book explores the most persistent issues to do with English and unpacks the history of "proper" usage. Where did these ideas spring from? Who has been on the front lines in the language wars? The Language Wars examines grammar rules, regional accents, swearing, spelling, dictionaries, political correctness, and the role of electronic media in reshaping language. It also takes a look at such details as the split infinitive,

Dates form the backbone of  
written history. But where do  
these dates come from? Many  
different calendars were used  
in the ancient world. Some of  
these calendars were based  
upon observations or

---

calculations of regular astronomical phenomena, such as the first sighting of the new moon crescent that defined the beginning of the month in many calendars, while others incorporated schematic simplifications of these phenomena, such as the 360-day year used in early Mesopotamian administrative practices in order to simplify accounting procedures. Historians frequently use handbooks and tables for converting dates in ancient calendars into the familiar BC/AD calendar that we use today. But very few historians understand how these tables have come about, or what assumptions have been made in their construction. The seven papers in this volume provide an answer to the question what do we know about the operation of calendars in the ancient world, and just as importantly how do we know it? Topics covered include the ancient and modern history of the Egyptian 365-day calendar, astronomical and administrative calendars in ancient Mesopotamia, and the development of astronomical

---

calendars in ancient Greece. This book will be of interest to ancient historians, historians of science, astronomers who use early astronomical records, and anyone with an interest in calendars and their development.

*An Economist's Guide to Economic History* Penguin

A stunningly insightful account of the global political and economic system, sustained first by Britain and now by America, that has created the modern world. The key to the two countries' predominance, Mead argues, lies in the individualistic ideology inherent in the Anglo-American religion. Over the years Britain and America's liberal democratic system has been repeatedly challenged—by Catholic Spain and Louis XIV, the Nazis, communists, and Al Qaeda—and for the most part, it has prevailed. But the current conflicts in the Middle East threaten to change that record unless we foster a deeper

---

understanding of the conflicts between the liberal world system and its foes.

Concise and lucid writing made this book in its first edition the leading research methods text written specifically for counselors. The text introduces reader to the basics of how to do research— from formulating a problem, doing a literature review, selecting a design, collecting and analyzing data, through reporting results. It also provides readers with the information they need to become intelligent consumers of published research. Covering a broad range of quantitative, qualitative, and mixed methods designs, as well as action research and program evaluation, the text presents the most common types of research used in the field of counseling.
