Case is shown in different ways in Ithkuil depending on whether the case is being manifested in conjunction with a formative or a personal reference adjunct (explained in Section 8.1).For formatives, the 72 primary cases are shown by one of 72 forms of the vocalic affix Vc.

[Russian Case Morphology and the Syntactic Categories | The ...](#)

Case is a feature that expresses a syntactic and/or semantic function of the element that carries the particular case value.

Most cases which express a syntactic function are also associated with a semantic function (e.g. of an agent, an experiencer, an undergoer) for particular classes of predicates in the given language.

Russian case morphology and the syntactic categories David ...

Case is a special grammatical category of a noun, pronoun, adjective, participle or numeral whose value reflects the grammatical function performed by that word in a phrase, clause or sentence. In some languages, nouns, pronouns, adjectives, determiners, participles, prepositions, numerals, articles and their modifiers take different inflected forms, depending on their case.

[Case - Surrey Morphology Group](#)

1. Introduction. In his Russian case morphology and the syntactic categories, David Pesetsky addresses core questions of Case Theory and proposes an entirely new program of research into the grammar of case. The program rests on two pivots: first, one should treat case as a signature property of a given grammatical category rather than its descriptive feature, and, second, one should build the ...

[Functions of the Major Linguistic Categories](#)

Relational adjectives are derived from nouns and function to identify a noun, e.g. dental floss does not tell us anything about this kind of floss but simply identifies its function as having to do with teeth. Importantly, these adjectives cannot compare, occur in predicate position (they may only be placed in attributive position), or undergo ...
