A few decades ago mathematics played a modest role in life sciences. Today, however, a great variety of mathematical methods is

applied in biology and medicine. Practically every mathematical procedure that is useful in physics, chemistry, engineering, and economics has also found an important application in the life sciences. The past and present training of life scientists does by no means reflect this

development. However, the impact of the fast growing number of applications of mathematical methods makes it indispensable that students in the life sciences are offered a basic training in mathematics, both on the undergraduate and the graduate level. This book is primarily designed as a textbook

for an introductory course. Life scientists may also use it as a reference to find mathematical methods suitable to their research problems. Moreover, the book should be appropriate for self-teaching. It will also be a guide for teachers. Numerous references are included to assist the reader

in his search for the pertinent literature. *Probability and Statistical Models with Applications* Springer Science & Business Media The signature creation of cartoonist Roger Langridge, Fred the Clown is the thinking man's idiot. Fred has an eye for the ladies, as well as several other organs, but the only part of themselves they're willing to share with him is a carefully placed kneecap. Fred the Clown's misadventures are a curious balance of bleakness and joyful absurdism; the universe may dump

on Fred from a great height, but he never gives up. More often than not, they involve the pursuit of a lady—any lady will do, it seems, but bearded ladies are at the top of the list. Disappointment seems inevitable, and it usually is; yet, almost despite himself, Langridge will occasionally give Fred a happy ending out of nowhere... p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 13.9px Arial; color: #424242} After Mountains and Sea Watchprint.Com Editions A collection of poems and short stories. In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological.

Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air

of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to

produce the best outcomes. Xxxholic E-Booktime Llc

Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use,

interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men ' s struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African

' tradition ' that has become a clich é in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men ' s vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships

shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various

disciplines including anthropology, gender studies, African studies, psychology, and global health.

“ I have long believed that women who dream big, work hard, and get back up after they get knocked down can do anything; Stephanie Schriock is one of those women. I ’ m so glad her thoughtful guidance is now available for women everywhere. ” —Hillary Rodham Clinton
"Stephanie Schriock leads the leaders. ” —Michelle Lujan Grisham, governor of New Mexico “ Run to Win is an antidote to anxiety and a welcome call to action. I encourage every woman (and a few

From the president of EMILY's List, a playbook for women changing the world in politics, business, or any arena, with a foreword from Vice President Elect Kamala Harris. For the past thirty-five years EMILY's List has helped the campaigns of thousands of pro-choice Democratic women, but the hardest part has always been convincing more women to run. Then Donald Trump was elected, and something shifted into place. American women who were furious and frustrated were looking for a way to channel their outrage into action, united in proclaiming, "If that guy can get elected,

why not me?" The day after the 2016 election, dozens of women searched out an old sign-up link buried on the EMILY's List website. By Thanksgiving, those dozens had grown to a few thousand. And that was only the beginning. By the end of 2018, there were nearly fifty thousand women signed up to run for office, with scores more signing up each day. Run to Win is for all women who are looking to lead. Organized around the steps that EMILY's List coaches its candidates through (from deciding to run through celebrating victory), this book is full of essential lessons for any woman trying to succeed in a male-dominated field. Their arena is politics but their message is

universal. And Stephanie Schriock is the most qualified person to share these lessons. Not only is she a powerful figure in politics but she's also a woman who commands respect for her astounding success as president of EMILY's List and a longtime Democratic operative. Her message is uplifting and actionable, her voice is that of your best girlfriend walking you through what you need to consider as you make your plan, and her experience coaching the biggest female candidates in recent elections (including all of the female 2020 Democratic presidential candidates) makes her the de facto authority on the strategies women can employ to

run, fight, and win, whatever their field or goal.
