What is interactive art? Is this a genre? A medium? An art movement? Must a work be physically active to be classified as such, or do we interact when we sense and make sense? Is a switch-throw or link-click enough - I do this, and that happens - or must subjects and objects be confused over time? Is interaction multiple in its engagements (relational), or a one-to-one reaction (programmed)? Are interactive designs somehow more democratic and individualized than others, or is that merely a commercial strategy to sell products and ideas? This book argues that interactive art frames moving-thinking-feeling as embodiment; the body is addressed as it is formed, and in relation. Interactive installations amplify how the body's inscriptions, meanings, and matters unfold out, while the world's sensations, concepts, and matters enfold in. Interactive artwork creates situations that enhance, disrupt, and alter experience and action in ways that call attention to our varied relationships with and as both structure and matter. Nathaniel Stern's inspirational book, Interactive Art and Embodiment, outlines how new media has the ability to intervene in, and challenge, not only the construction of bodies and identities, but also the ongoing and emergent processes of embodiment, as they happen. It includes immersive descriptions of a significant number of interactive artworks and over 40 colour images. The theorists, artists, practitioners and curators discussed in this text include Brian Massumi, Christiane Paul, Sarah Cook, Beryl Graham, Kelli Fuery, Theodore Watson, William Kentridge, Char Davies, Stelarc, Janet Cardiff, Carlo Zanni, Tero Saarinen, Karen Barad, Daniel Rozin, Richard Schechner, Nicole Ridgway, Rebecca Schneider, Annie Sprinkle, Karen Finley, VALIE EXPORT, The Guerrilla Girls, Tegan Bristow, Brian Knep, Anna Munster, Zach Lieberman, Golan Levin, Simon Penny, Camille Utterback, Jean-Luc Nancy, The Millefiore Effect, Nick Crossley, Mathieu Briand, Scott Snibbe, David Rokeby, José Gil, Erin Manning, Rafael Lozano-Hemmer, and Norah Zuniga Shaw

Pop Hits for Five-Finger Piano Alfred Music  
Classic Keys is a beautifully photographed and illustrated book focusing on the signature rock keyboard sounds of the 1950s to the early 1980s. It celebrates the Hammond B-3 organ, Rhodes and Wurlitzer electric pianos, the Vox Continental and Farfisa combo organs, the Hohner Clavinet, the Mellotron, the Minimoog and other famous and collectable instruments. From the earliest days of rock music, the role of keyboards has grown dramatically. Advancements in electronics created a crescendo of musical invention. In the thirty short years between 1950 and 1980, the rock keyboard went from being whatever down-on-its-luck piano awaited a band in a bar or concert hall to a portable digital orchestra. It made keyboards a centerpiece of the sound of many top rock bands, and a handful of them became icons of both sound and design. Their sounds live on: Digitally, in the memory chips of modern keyboards, and in their original form thanks to a growing group of musicians and collectors of many ages and nationalities. Classic Keys explores the sound, lore, and technology of these iconic instruments, including their place in the historical development of keyboard instruments, music, and the international keyboard instrument industry. Twelve significant instruments are presented as the chapter foundations, together with information about and comparisons with more than thirty-six others. Included are short profiles of modern musicians, composers, and others who collect, use, and prize these instruments years after they went out of production. Both authors are avid musicians, collect and restore vintage keyboards, and are well-known and respected in the international community of web forums devoted to these instruments.
