I was born on Tuesday, December 5, 1977, 7:35 am in Queens General Hospital in Queens, New York. In junior high school, I met a young, Hispanic female named Yadeline. We had been friends for a while and then, in our

first year in high school, she had told me about a book that she had been writing. She pulled a 300-page spiral notebook filled with the book she had been writing. She had told me that her book had a plot somewhat similar to *The Babysitter's Club*. After she had shown me her novel, without even read it, I had told myself, "This is what I want to do. I can do this. I can write a book too." After that epiphany, I had started writing my first book *Alex's Dreams*. After a few weeks, I had written about ten to fifteen pages of it and I lost them all. I had no idea what I had done with my book. So, after that, I had taken that experience as a sign to say maybe I wasn't meant to be a writer. A little while after that experience, I was overwhelmed with new ideas for *Alex's Dreams*. So, one night, I just sat down and wrote. That night of writing turned into days. Then those days turned into weeks, months and years. To this day, I'm still brimming over with ideas for the

novel I am developing now and future projects. The main person I have to thank for my inspiration for finishing this novel is my mother, Katherine. Had it not been for her, this novel would have been collecting dust in my closet instead of in the stages of being published. She pushed me to not "sell myself short" and to not take short cuts and lay back. She taught me to use my initiative to my greatest advantage and for that I am grateful. Another person for whom I have to thank for most of the ideas for this novel is mywife, Leslie. In terms of the periled journeys of being involved in a relationship, she has opened my eyes to many different aspects of life. She showed me the very complex and advanced levels that a relationship could and variably does enter. From dating to marriage and beyond, she has taught me so much about myself and what type of relationship I am capable of. My personal quote to myself, whenever things aren't going my way is "Keep the Faith!" That's what I say to myself whenever my life seems to be taking a dramatic turn for the worse. All you have to do is keep the faith and keep hope alive and everything will turn out fine. In other instances, some other mottos apply. It's just that my motto "Keep the Faith" pretty much applies to everything. I am finished writing my second novel, which is a continuation of this first one. This work will delve more into the darker element of reality, such as the loss of a family member, rape, infidelity and more. I also must admit, the sex scenes in this new work are more extreme and raunchier than I ever anticipated. I also have created a floor plan for a mature adventure book, delving into the life of a woman journeying through life in a world where she recognizes no moral value but she still retains her personal integrity. She travels attempting to spread wholesome and good moral values. In a nutshell, she is a good woman in a bad world.

The Self-interpreting Bible "O'Reilly Media, Inc." publication of the book marks the beginning of a new epoch in the study of the mechanics of horology.

Here is a unique book. It describes the theories and processes of repairing and adjusting the modern watch in precise and meticulous detail: a thing which has never been done so completely before in the many books on the same subject. As a text book it is a revelation. Taking nothing for granted, except the ability to read and comprehend a simple description of mechanical processes, de Carle takes his reader through every stage and every operation of watch repairing ...and to deal with them thoroughly is quite a programme - it takes 300 pages containing 24 chapters, two appendices and 553 illustrations. The fine draughtsmanship and accurate technical detail of the illustrations set a new standard. Practical Watch Repairing can justifiably claim to be the best illustrated book on practical horology yet issued, and one of the best of its kind on any subject. The

Bowden's brilliant account of the longest (some of the material is still classified), sustained firefight involving American troops since the Vietnam War. On October 3, 1993, about a hundred elite U.S. soldiers were dropped by helicopter into the teeming market in the heart of Mogadishu, Somalia. Their mission was to abduct two top lieutenants of a Somali warlord and return to base. It was supposed to take an hour. Instead, they found themselves pinned down through a long and terrible night fighting against thousands of heavily armed Somalis. The following morning, eighteen Americans were dead and more than seventy had been badly wounded. Drawing on interviews from both sides, army records, audiotapes, and videos

Bowden's minute-by-minute narrative is one of the most exciting accounts of modern combat ever written—a riveting story that captures the heroism, courage, and brutality of battle.

To enjoy woodworking, all you need is a few essential tools, a little bit of space, and the desire to make something with your own two hands. *The Minimalist Woodworker* is about making woodworking clean and simple--from the tools and the workspace to the easy-to-follow instructions. Woodworking is thriving in the hands-on, DIY, maker world we currently live in. Yet, for it's increasing popularity, there are many crafters who don't engage in woodworking because they falsely believe you need a large workshop and a

---

full-blown collection of tools and equipment. The Minimalist Woodworker disproves this myth. It eliminates the fears and excuses as it demystifies the craft. Written by Vic Tesolin, aka the Minimalist Woodworker, a woodworker and woodworking instructor, The Minimalist Woodworker is a stress-free approach for the hobbyist that emphasizes the destination is actually the journey. Beginning with an understanding of the minimalist mindset, The Minimalist Woodworker quickly details how to make a small space productive and outlines the most efficient tools for a woodworker. Each piece of equipment is explained and instructions on how to use are provided. Techniques for keeping them sharp and maintained are also explained. Once space and tools are covered, seven projects are presented: a saw bench and matching saw horse, a Nicholson-style workbench, a shooting board/bench hook, a shop mallet, and a small hanging cabinet. Each project not only develops woodworking skills, but also outfits the minimalist woodworker's small shop. With step-by-step instruction, photos and illustrations, and an easy-going voice, The Minimalist Woodworker offers a stress-free point of entry into the life-long craft of woodworking.
