Logistics Transportation Systems compiles multiple topics on transportation logistics systems from both qualitative and quantitative perspectives, providing detailed examples of real-world logistics workflows. It explores the key concepts and problem-solving techniques required by researchers and logistics professionals to effectively manage the continued expansion of logistics transportation systems, which is expected to reach an estimated 25 billion tons in the United States alone by 2045. This book provides an ample understanding of logistics transportation systems, including basic concepts, in-depth modeling analysis, and network analysis for researchers and practitioners. In addition, it covers policy issues related to transportation logistics, such as security, rules and regulations, and emerging issues including reshoring. This book is an ideal guide for academic researchers and both undergraduate and graduate students in transportation modeling, supply chains, planning, and systems. It is also useful to transportation practitioners involved in planning, feasibility studies, consultation and policy for transportation systems, logistics, and infrastructure. Provides real-world examples of logistics systems solutions for multiple transportation modes, including seaports, rail, barge, road, pipelines, and airports Covers a wide range of business aspects, including customer service, cost, and decision analysis Features key-term definitions, concept overviews, discussions, and analytical problem-solving
The Cultivator & Country Gentleman Jones & Bartlett Learning
Thoroughly updated and expanded, Fundamentals of Medium/Heavy Diesel Engines, Second Edition offers comprehensive coverage of basic concepts and fundamentals, building up to advanced instruction on the latest technology coming to market for medium- and heavy-duty diesel engine systems.
Random House

When Richard Jordan is found dead in the woods outside of Coventry, the town's reputation for being paranormal is put into the spotlight. Richard wasn't just murdered. The person who found him was shocked by what looked like a Satanic ritual murder. Suddenly, the town's regular tourism starts to dry up. In its place is a flood of weirdos and wannabe Satanists who are there to finish the ritual they believe Richard's murder began. Is this the apocalyptic scenario that Kinsley was prophesied to stop? Or, did someone want the town drunk dead and used a bunch of dark magical items to make it look paranormal? What about the mysterious black book that shows up on Kinsley's doorstep? Does it hold the key to solving the crime, or does it represent something far more sinister? Come along as Kinsley and friends solve this crime one spell at a time! Book of Dark Magic is book four in the Familiar Kitten Mysteries cozy mystery series. You'll find no swearing, gore, or adult situations, but you will find magic, mystery, and a hint of lighthearted mayhem.

Rural New Yorker HarperCollins
Two men played a crucial role in the creation and early history of the National Park Service: Stephen T. Mather, a public relations genius of sweeping vision, and Horace M. Albright, an able lawyer and administrator who helped transform that vision into reality. In *Creating the National Park Service*, Albright and his daughter, Marian Albright Schenck, reveal the previously untold story of the critical "missing years" in the history of the service. During this period, 1917 and 1918, Mather's problems with manic depression were kept hidden from public view, and Albright, his able and devoted assistant, served as acting director and assumed Mather's responsibilities. Albright played a decisive part in the passage of the National Park Service Organic Act of 1916; the formulation of principles and policies for management of the parks; the defense of the parks against exploitation by ranchers, lumber companies, and mining interests during World War I; and other issues crucial to the future of the fledgling park system. This authoritative behind-the-scenes history sheds light on the early days of the most popular of all federal agencies while painting a vivid picture of American life in the early twentieth century.

This is the exciting story of the development of U.S. airmobile power from theory to practice, involving air transport, fixed wing aircraft, and attack helicopters culminating in Vietnam War operations. It includes analysis of airmobile combat operations; doctrinal and interservice disputes; equipment descriptions; and the organization of combat and support units. It also includes data about airmobility in South Vietnam's army and it features personal reflections of the author, who was at the center of airmobility development and who commanded large airmobile units. John J. Tolson in June 1939 participated in the first tactical air movement of ground forces by the U.S. Army. He was in all combat jumps of the 503d Parachute Infantry Regiment during World War II, became an Army aviator in 1957, and served as Director of Army Aviation and Commandant of the Army Aviation School. From April 1967 to July 1968 he commanded the 1st Cavalry Division (Airmobile), Vietnam. (Includes many maps and photographs)

Designed to be read with a buddy, this dialogue between an aardvark and a mouse contains only kindergarten or first-grade words, making it a unique first reading book. Sentences are short, with lots of repetition for reinforcement and to build reading confidence. Early childhood specialist and former Romper Room teacher "Miss Karen" believes that reading should be easy and fun, and that reading with a buddy brings pleasure to young children. Recalling the classic children's book *The Little Engine* that Could, this story encourages beginning readers to believe in themselves. They will want to read it over and over again, and will be proud to say "I can read!"

New York Times bestselling author and artist James Dean brings us a fun, epic sea adventure with Captain Pete in *Pete the Cat and the Treasure Map!* When Captain Pete discovers a treasure map, he and his crew are ready to set out and sail the seas to find the buried gold and jewels. But they weren't expecting to find a giant sea monster along the way! Don't miss Pete's other storybook adventures, including *Pete the Cat: Construction Destruction*, *Pete the Cat: Cave-cat Pete*, *Pete the Cat: Out of This World*, *Pete the Cat: Robo-Pete*, and more!

Michigan Roads and Construction
This book presents theories and case studies for corporations in developed nations, including Japan, for designing strategies to maximize opportunities and minimize threats in business expansion into developing nations. The case studies featured here focus on Asia, including China and India, and use examples of Japanese manufacturers. Five case studies are provided, including Hitachi Construction Machinery and Shiseido in China and Maruti Suzuki in India. These cases facilitate the reader's understanding of the business environments in emerging economies. This volume is especially recommended for business people responsible for international business development, particularly in China and India. In addition, the book serves as a useful resource for students in graduate-level courses in international management.

I Think I Can
After building up a successful life in New York and hiding her past, Nina Bloom returns to Florida to confront the terrible secret that shattered her life eighteen years ago and protect an innocent man who is framed for murder.
