Oldirt, the main issue would be the engine speed, the D342 in D8's runs between 1200 and 1350 ish rpm then through a drive divider torque converter set up so its low speed stuff, the 3406

pumps power out past 2'000 rpm this would not fit in well with the drive line, the D342 was an engine built near only to power a D8. ttractors

I'm not sure when Cat changed from head studs to bolts, both my K's had spacer engines with head bolts and my H had studs. The older D342 engines with studs would sometimes be very hard to remove

the head from the studs. If the engine had been together for a long time the head would be stuck to the studs.
