3406 cat engine bolt torque specs - JustAnswer
Install bolts first in the center and work out toward the edge. Tighten all bolts to the

specified torque (see chart below for specifications).
Set bolt heads firmly into the edge countersink using a heavy hammer. Safety glasses MUST be worn when striking bolt heads.
Tighten all bolts again to the specified torque.

C15 engine
specs and
bolt torques**

At 1,700 rpm the C12 will produce 1,400 foot-pounds of torque. At the maximum number of revolutions per minute, which is 2,100, the C12 will produce just under 1,100 foot-pounds of torque. Torque rise is the difference in maximum

torque and torque at a rated rpm.

The torque rise percentage of this diesel engine is 53.
