Personhood is considered at once a sign of legal-political status and of socio-cultural agency, synonymous with the rational individual, subject, or citizen. Yet, in an era of life-extending technologies, genetic engineering, corporate social responsibility, and smart technology, the definition of the person is neither benign nor uncontested. Boundaries that previously worked to secure our place in the social order are blurring as never before. What does it mean, then, to be a person in the twenty-first century? In *Impersonations*, Sheryl N. Hamilton uses five different kinds of persons - corporations, women, clones, computers, and celebrities - to discuss the instability of the concept of personhood and to examine some of

the ways in which broader social anxieties are expressed in these case studies. She suggests that our investment in personhood is greater now than it has been for years, and that our ongoing struggle to define the term is evident in law and popular culture. Using a cultural studies of law approach, the author examines important issues such as whether the person is a gender-neutral concept based on individual rights, the relationship between personhood and the body, and whether persons can be property. *Impersonations* is a highly original study that brings together legal, philosophical, and cultural expressions of personhood to enliven current debates about our place in the world.

The Science of Everything Lloyd's Register

Diagnostics, or fault finding, is a fundamental part of an automotive technician's work, and as automotive systems become increasingly complex there is a greater need for good diagnostic skills. This new edition is fully updated to the latest technological and curriculum developments and is the only book to treat automotive diagnostics as a science rather than a check-list procedure. Each chapter includes basic principles and examples of a vehicle

system followed by the appropriate diagnostic techniques, complete with useful diagrams, flow charts, case studies and self-assessment questions. The book will help new students develop diagnostic skills and help experienced technicians improve even further. With added content relating to serial code readers and the use of computers in diagnostics (particularly laptop based diagnostics) for all areas such as engines, chassis, transmission and electrical systems, the diagnostic procedures in this new edition have been expanded and clearly illustrated to match new and existing qualifications and standards. â € ¢ The first book to focus on the science of diagnostics complete with overview descriptions of how systems operate, diagnostic case studies, detailed diagrams and flow charts, and self-assessment questions â € ¢ Essential text for students studying fault diagnosis and repair, and valuable reference for automotive personnel, from mechanics to service managers. â € ¢ Covers IMI and City & Guilds Technical Award, Certificate and Diploma requirements, plus NVQ/VRQ levels 3 & 4, and HNC/D courses

The acceleration of globalization and the growth of emerging economies present significant opportunities for business expansion. One of the quickest ways to achieve effective international expansion is by leveraging the web, which allows for technological connectivity of global markets and opportunities to compete on a global basis. To systematically engage and thrive in this networked global economy, professionals and students need a new skill set; one that can help them develop, manage, assess and optimize efforts to successfully launch websites for tapping global markets. This book provides a comprehensive, non-technical guide to leveraging website localization strategies for global e-commerce success. It contains a wealth of information and advice, including strategic insights into how international business needs to evolve and adapt in light of the rapid proliferation of the 'Global Internet Economy'. It also features step-by-step guidelines to developing, managing and optimizing international-multilingual websites and insights into cutting-edge web localization strategies.
