Personhood is considered at
once a sign of legal-
political status and of socio-
cultural agency, synonymous
with the rational individual,
subject, or citizen. Yet, in
an era of life-extending
technologies, genetic
engineering, corporate social
responsibility, and smart

technology, the definition of
the person is neither benign
nor uncontested. Boundaries
that previously worked to
secure our place in the
social order are blurring as
never before. What does it
mean, then, to be a person in
the twenty-first century? In
Impersonations, Sheryl N.
Hamilton uses five different
kinds of persons -
corporations, women, clones,
computers, and celebrities -
to discuss the instability of
the concept of personhood and
to examine some of the ways
in which broader social
anxieties are expressed in
these case studies. She
suggests that our investment
in personhood is greater now
than it has been for years,
and that our ongoing struggle
to define the term is evident
in law and popular culture.
Using a cultural studies of
law approach, the author
examines important issues
such as whether the person is
a gender-neutral concept
based on individual rights,
the relationship between
personhood and the body, and
whether persons can be
property. Impersonations is a
highly original study that
brings together legal,
philosophical, and cultural
expressions of personhood to
enliven current debates about
our place in the world.

Impersonations Delene Kvasnicka
Diagnostics, or fault finding, is a
fundamental part of an automotive
technician's work, and as
automotive systems become
increasingly complex there is a
greater need for good diagnostic
skills. This new edition is fully
updated to the latest technological
and curriculum developments and is

the only book to treat automotive
diagnostics as a science rather than
a check-list procedure. Each
chapter includes basic principles
and examples of a vehicle system
followed by the appropriate
diagnostic techniques, complete
with useful diagrams, flow charts,
case studies and self-assessment
questions. The book will help new
students develop diagnostic skills
and help experienced technicians
improve even further. With added
content relating to serial code
readers and the use of computers in
diagnostics (particularly laptop
based diagnostics) for all areas
such as engines, chassis,
transmission and electrical systems,
the diagnostic procedures in this
new edition have been expanded
and clearly illustrated to match new
and existing qualifications and
standards. â € ¢ The first book to
focus on the science of diagnostics
complete with overview
descriptions of how systems
operate, diagnostic case studies,
detailed diagrams and flow charts,
and self-assessment questions
â € ¢ Essential text for students
studying fault diagnosis and repair,
and valuable reference for
automotive personnel, from
mechanics to service managers.
â € ¢ Covers IMI and City & Guilds
Technical Award, Certificate and
Diploma requirements, plus
NVQ/VRQ levels 3 & 4, and HNC/D
courses

The acceleration of globalization and the growth of emerging economies present significant opportunities for business expansion. One of the quickest ways to achieve effective international expansion is by leveraging the web, which allows for technological connectivity of global markets and opportunities to compete on a global basis. To systematically engage and thrive in this networked global economy, professionals and students need a new skill set; one that can help them develop, manage, assess and optimize efforts to successfully launch websites for tapping global markets. This book provides a comprehensive, non-technical guide to leveraging website localization strategies for global e-commerce success. It contains a wealth of information and advice, including strategic insights into how international business needs to evolve and adapt in light of the rapid proliferation of the 'Global Internet Economy'. It also features step-by-step guidelines to developing, managing and optimizing international-multilingual websites and insights into cutting-edge web localization strategies.
