ways to tackle the challenges faced by governments from the local and national level and beyond. Along the way, the editors and their contributors examine important policy questions to encourage fresh thinking on ways to improve the educational system and, in turn, to buoy the

development of the region as a whole. Lonely Days Technology and Sustainable Development in the 21st Century The impact of disasters and crises on agriculture and food security: 2021 "Sons and daughters website, with info on the band and their activities" HTML meta. Vocationalisation of Secondary Education Revisited Springer Nature Published in the year 1971, The History of Education in Ghana is a valuable contribution to

the field of History. **IB WORLD SCHOOLS YEARBOOK 2019** Wentworth Press Livestock rearing is an integral part of socio-economic framework of India since time immemorial. Livestock sub-sector being a vital component of agriculture sector, plays a multidimensional role and acts as a tool in achieving nutritional

security, employment generation and socio-economic development of rural sector, particularly among the landless, small, marginal farmers and women. India possesses huge livestock population of varying production potentials, distributed across different agro-ecological zones under different operational and livestock holding size. Hence, it requires

different package of practices for their management. Further, factors like drivers of development change and climate change pose many challenges to this sector. Farm animal management encompasses integrated and precise application of basic scientific principles of breeding, feeding, heeding and weeding in general as well as in times of specific need.

Therefore, an attempt has been made in this book to cover all these basic and applied aspects of livestock management in detail. In the perspective of reorganization of the syllabus of veterinary science and animal husbandry programme. This book is appropriately divided into fifteen s covering almost each and every aspect of livestock production management.

The Saint Springer Science & Business Media
The book is a cutting-edge contribution to the debate which has occurred for some time on the pros and cons of secondary education becoming more closely and explicitly related to preparing young people for the world of work. The book provides concrete examples of the vocationalisation of secondary education, with particular reference to the situation in Africa. The target audience for the book includes policy-makers, practitioners, administrators, education planners, researchers, teachers and teacher educators with a concern about the relationship between

secondary education and education for the world of work (with particular reference to technical and vocational education and training - TVET.) The book appears in the Springer book series on ' Technical and Vocational Education and Training: Issues, Concerns and Prospects ' and compliments the ' International Handbook of Technical and Vocational Education and Training ' and other publications in the ' International Library of TVET ' all of which are publications of the ' UNESCO-UNEVOC International Centre for TVET ' in Bonn, Germany

This edited book brings together an international cast of contributors to examine how academic literacy is learned and mastered in different tertiary education settings around the world. Bringing to the fore the value of qualitative enquiry through ethnographic methods, the authors illustrate in-depth descriptions of genre knowledge and academic literacy development in first and second language writing. All of the data presented in the chapters are original, as well as innovative in the field in terms of

content and scope, and thought-provoking regarding theoretical, methodological and educational approaches. The contributions are also representative of both novice and advanced academic writing experiences, providing further insights into different stages of academic literacy development throughout the career-span of a researcher. Set against the backdrop of internationalisation trends in Higher Education and the pressure on multilingual academics to publish their research outcomes in English,

this volume will be of use to academics and practitioners interested in the fields of Languages for Academic Purposes, Applied Linguistics, Literacy Skills, Genre Analysis and Acquisition and Language Education. The Student's Cookery Book Sub-Saharan Pub & Traders "Easy-to-make pictures with paint, fabric, paper, yarn and lots more ... plus how-to's for framing"--Jacket subtitle. Technology and Sustainable Development in the 21st Century Cambridge University Press

This novel is centred around the experiences of women in contemporary Nigeria. It follows the adolescent plans and dreams of Li as she struggles for independence against the traditional values of her family home, marriage and the lure of the city and all it can offer. We appreciate your

support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.
Studies in Mathematics Education Springer
High-stakes public examinations exert a dominant influence in most education systems. They affect both teacher and student behavior, especially at the middle and upper levels of secondary education. The content of past examinations tends to dictate what is taught and how it is taught and, more important, what is learned and how it is learned. By changing aspects of these examinations, especially their

content and format, education systems can have a strong positive impact on teacher behavior and student learning, help raise student achievement levels, and better prepare students for tertiary-level education and for employment. Examination agencies, many of which have followed the same procedures over decades, can learn from the successes and failures of other systems. This book addresses current issues related to the development, administration, scoring, and usage of these high-stakes public examinations, identifying key issues and problems related to examinations in many emerging market economies as well as in advanced

economies. The book 's primary audience consists of public examination officials on national, regional, and state examination boards, but the book should also be of interest to senior education policy makers concerned with certification and learning achievement standards, to academics and researchers interested in educational assessment, to governmental and education agencies responsible for student selection, and to professionals at development organizations. " This extremely well-written and comprehensive book offers a timely review of the diversity of public examination practices worldwide; of the tensions

between examinations and learning; and of the technical expertise involved in the creation of valid, reliable, and fair assessments. It reminds us that as " the diploma disease † ? takes hold with an ever-greater intensity at every stage of education worldwide, and the commercial business of testing flourishes, those concerned with educational quality and meaningful learning must be on guard to prevent the assessment tail wagging the educational dog. † ? Angela W. Little, Professor Emerita, Institute of Education, University College London " This book is very well structured and written and draws on the authors ' remarkable global

knowledge across countries and histories. It will be a great asset both to administrators responsible for examinations and to academics and other professionals who seek to understand the nature and impact of examinations of different types and in different settings. † ? Mark Bray, UNESCO Chair Professor of Comparative Education, University of Hong Kong; and former Director, UNESCO International Institute for Educational Planning “ I am sure that Public Examinations Examined, which thoroughly analyzes the practice of public examinations in different countries and makes profound and

well-grounded conclusions, will arouse very great interest and will serve to further improve public examinations. † ? Victor Bolotov, Distinguished Professor, Higher School of Economics, National Research University, Moscow; member, Russian Academy of Education; and former Deputy Minister of Education, Russian Federation Modern Commercial Knowledge Addison-Wesley Longman This book is a first-of-its-kind, five-country empirical study of the causes and consequences of social and economic rights

litigation. Detailed studies of Brazil, India, Indonesia, Nigeria, and South Africa present systematic and nuanced accounts of court activity on social and economic rights in each country. The book develops new methodologies for analyzing the sources of and variation in social and economic rights litigation, explains why actors are now turning to the courts to enforce social and economic rights, measures the aggregate impact of litigation in each country, and assesses the relevance of the empirical findings for legal theory.

This book argues that courts can advance social and economic rights under the right conditions precisely because they are never fully independent of political pressures. Public Examinations Examined Food & Agriculture Org. Street life in the slums of Accra is realistically portrayed in this socially-committed, subtle novel about four educated women who are inspired by the plight of a 14-year old girl, Fofo. As the main characters convert their library center into a practical street initiative, the novel invokes the squalor, health risks, and vicious cycles of poverty and violence that drive children to

the streets and women to prostitution; and, from which, ultimately, no one in the society is free. The Kingsway Book of Cookery Unipub On top of a decade of exacerbated disaster loss, exceptional global heat, retreating ice and rising sea levels, humanity and our food security face a range of new and unprecedented hazards, such as megafires, extreme weather events, desert locust swarms of magnitudes previously unseen, and the COVID-19 pandemic. Agriculture underpins the livelihoods of over

2.5 billion people – most of them in low-income developing countries – and remains a key driver of development. At no other point in history has agriculture been faced with such an array of familiar and unfamiliar risks, interacting in a hyperconnected world and a precipitously changing landscape. And agriculture continues to absorb a disproportionate share of the damage and loss wrought by disasters. Their growing frequency and intensity, along with the systemic nature of risk, are upending people's lives, devastating livelihoods, and

jeopardizing our entire food system. This report makes a powerful case for investing in resilience and disaster risk reduction – especially data gathering and analysis for evidence informed action – to ensure agriculture 's crucial role in achieving the future we want.

Cookery Nipa

This book provides a comparative look at key issues that characterize and contextualize upper secondary science education in sixteen countries in Oceania, South

America, Asia, Europe, North America, Africa, and the Middle East, including links with elementary and early science, final assessment, and the secondary/tertiary education interface.

The Month

The monograph "Explicit Biology: A Revision Course" for UTME, POST-UTME and other related examinations written by O.J.

Olaoye is a complementary text to the various textbooks that have been written in the subject area. The book has five sections and twenty six chapters on all the biology topics. This book has become

timely in view of the poor results that are being witnessed in the UTME examination especially in the sciences and mathematics, biology inclusive. These majorly are due to poor or inadequate access to good study materials. Each chapter has annotated topics followed by copious specimen questions on some past UTME and POST -UTME examination, for practice and emphasis. The topics in each chapter are adequately treated and with clarity. The illustrations are simple but effective. The author has done a lot of work and put in efforts to come out with a very readable and useful text. It is highly recommended to all the students

aspiring to undertake the UTME and POST-UTME examination, in order to improve highly their chances of success. O.A. Sofola B.Sc, M.Sc, M.B.B.S (Lagos), Ph.D (Leeds), FAS (Nig.) Professor of physiology, College of Medicine, University of Lagos Former Vice Chancellor, OOU, Ago- Iwoye. Ogun State.

Farm Animal Management

This edition has been completely redesigned and updated taking into account the recent trends toward healthy catering and the attractive presentation of food. Lavish, full-color photographs illustrate the stages involved in the preparation of various recipes. Many

dishes are depicted in their finished form to give readers an impression of correct presentation and service. This revision features nutritional data for the main recipes. Includes information about different types of foods and the processes of cookery along with hundreds of classic recipes. Many ingredients are given alternatives to comply with the principles of healthy eating.
