Distribution Law of the United States has
extensive discussions of the various
methods for distribution and applicable
laws, including locating and recruiting

distributors, UCC Article 2, product liability,
product warranties, trade regulation,
antitrust considerations, the intellectual
property laws -- patent, trade secret, and
copyright -- which have varying degrees of
importance in product distribution, and an
extensive treatment of trademark law and
labeling, which are almost always important
in product distribution. The text also has
brief discussions of other areas of law that
are relevant to product distribution,
including United States import regulation.

About the Book: Authors have taken
special care to present the various

topics in Programming with C++ in an easy-to-learn style. Almost every topic is followed by well designed live programmes so that it becomes easy to grasp the underlying principle or programming technique. A total of more than 450 live programmes are included in the book. It is also taken care that programmes are short and do not include such details which do not relate to the topic on hand. This makes them easy to be tested and suitable for practice students. Authors are confident that the book will prove its worth for th.

The Marine Environment Protection Committee (MEPC) of IMO, at its sixty-second session in July 2011, adopted the Revised MARPOL Annex V, concerning Regulations for the prevention of pollution by garbage from ships, which enters into force on 1 January 2013. The associated guidelines which assist States and industry in the implementation of MARPOL Annex V have been reviewed and updated and two Guidelines were adopted in March 2012 at MEPC's sixty-third session. The 2012 edition of this publication contains: the 2012 Guidelines for the

implementation of MARPOL Annex V (resolution MEPC.219(63)); the 2012 Guidelines for the development of garbage management plans (resolution MEPC.220(63)); and the Revised MARPOL Annex V (resolution MEPC.201(62)).

The Tools of Science

This book aims to provide useful tips for the understanding of scientific research processes and practical advice for people engaged in this field. It is a reflection of the author's more than 40 years of experience in medical and cancer research, and is written in a colloquial style to reach not only the young audience who are considering devoting their lives to biomedical research, but also to those who are already engaged in this field. The author emphasizes the unique traits and qualifications required for performing scientific research and also describes the different modalities which can be performed in our actual scientific environment. There are numerous practical advices in this book, such as guidelines on writing a grant proposal and the first peer-reviewed manuscript, the selection criteria of the training laboratory and mentors, as well as keeping records of experimental data. The author also provides his insight on the personal inner drive and motivation critical for conducting scientific research, as well as the importance of working on a problem without losing the human perspective of this specific and unique human endeavor.
