*Its Origin and Contemporary Significance*  
USCCB Publishing

The impact of the industrial revolution on the social structures of industrialized nations posed a difficult challenge to the Catholic Church and its Popes. In the struggle for human and economic status, should the Church side with the new working class or with capitalist barons who, along with the old aristocracy, identified themselves as upholders of Christian civilization? In this history of papal social teaching, Joe Holland tells how the popes at first backed the status quo. Then, with the accession of Pope Leo XIII in 1878, a seismic shift took place. Leo's encyclical *Rerum novarum* was the first authoritative Church voice to declare that laboring people have rights--the right to fair wages, to decent living conditions, the right to organize labor unions and even to strike. Henceforth the notion of civilization, at least for the Church, would be grounded in the lives and aspirations of working people. Modern

Catholic Social Teaching traces this historic shift as it played out in the writings of Leo and the popes who followed him: Pius X, Benedict XV, Pius XI, and Pius XII. These popes supported Leo's encyclical and even elaborated it as European history experienced the emergen

*An Introduction to Catholic Social Thought* Springer Science & Business Media

This book identifies both the consistencies and disparities between Catholic Social Teaching and the United Nation's (UN) Sustainable Development Goals (SDGs). With Pope Francis' *Laudato si'* encyclical, Catholicism seems to be engaging more than ever with environmental and developmental concerns. However, there remains the question of how these theological statements will be put into practice. The ongoing involvement of the Catholic Church in social matters makes it a significant potential partner in issues around development. Therefore, with the use of the comparative method, this book brings together authors from multiple disciplines to assess how the political and legal aspects of each of the UN's 17 SDGs are addressed by Catholic Social Teaching. Chapters answer the question of how the Catholic Church evaluates the concept of

sustainable development as defined by the Agenda 2030 Goals, as well as assessing how and if it can contribute to shaping the contemporary concept of global development. Examining the potential level of cooperation between the international community and the Catholic Church in the implementation of the Agenda 2030 Goals, this volume will be of keen interest to scholars of Catholic Studies, Religious Studies and the Sociology of Religion, as well as Environmental Studies and Development Studies.

Celebrated moral theologian Charles E. Curran examines and critiques Pope Benedict XVI 's contribution to Catholic social teaching in this Georgetown Digital Short, available exclusively in this concise digital format. In his eight-year pontificate (2005-13) Pope Benedict XVI wrote two encyclicals that are significant for Catholic social teaching: *Deus caritas est* (God Is Love) in 2005, and *Caritas in veritate* (Charity In Truth) in 2009. Curran analyzes and compares the teaching proposed in these two encyclicals, given that these two documents reflect differing approaches. He explores presuppositions found in *Caritas in veritate* within the tradition of Catholic social teaching and discusses the theological, ethical, and ecclesial methodologies of the encyclical. Examining the substance and content of *Caritas in veritate* and its relationship to Catholic social teaching, Curran focuses on its approach to the person, political and civil society, and specific issues and topics. This is the first exploration of Pope Benedict XVI 's impact on Catholic social teaching. Georgetown Digital Shorts—longer than an article, shorter than a book—deliver timely works of peer-reviewed scholarship in a fast-paced, agile environment. They present new ideas and original texts that are easily and widely available to students, scholars, libraries, and general readers.

*Equipped for the Work of Ministry* Peter Lang

In 2018, for the first time in nearly forty years, the United States Conference of Catholic Bishops published a pastoral letter against racism. *Open Wide Our Hearts* is a call to a humble and expansive love that respects human dignity and unites us all in Christ. Now, in *Reading, Praying, Living* The US Bishops' *Open Wide Our Hearts*, Alison Benders offers a resource designed to help parishes, RCIA programs, campus ministries, and Catholic readers unpack and grapple with this important document. Benders provides background on the social doctrine that grounds the document, describes why it's so timely, and offers a plan for studying the letter, personally or as a group. In an engaging and accessible way, she walks readers through the scriptural, theological, and moral guidance needed to form our consciences and convert our hearts. And because the work of racial healing is a journey, not an event, each section of the guide also includes questions for personal reflection and attentive discussion and prayers for spiritual renewal or reconciliation.

*Sociology and Catholic Social Teaching: Contemporary Theory and Research* offers critical insights into a badly needed alternative vision to the alienation and cynicism that plague our political discourse. Arguing that Catholic social teaching stands as an important morally grounded framework for addressing today's pressing social problems, contributors explore the general principles and specific criteria required for both evaluating and advocating models of social improvement. This anthology is meant for advanced undergraduate and graduate students of sociology or Catholic social thought, as well as scholars in these areas interested in how sociology and Catholic social teaching converge.

**Cardinal Cahal Daly and the Pursuit of the Peaceable Kingdom** ISPCK

This book investigates the response of the Catholic Church in Northern Ireland to the conflict in the region during the late

Twentieth Century. It does so through the prism of the writings of Cardinal Cahal Daly (1917-2009), the only member of the hierarchy to serve as a bishop throughout the entire conflict. This book uses the prolific writings of Cardinal Daly to create a vision of the 'Peaceable Kingdom' and demonstrate how Catholic social teaching has been used to promote peace, justice and nonviolence. It also explores the public role of the Catholic Church in situations of violence and conflict, as well as the importance for national churches in developing a voice in the public square. Finally, the book offers a reflection on the role of Catholic social teaching in contemporary society and the ways in which the lessons of Northern Ireland can be utilised in a world where structural violence, as evidenced by austerity, and reactions to Brexit in the United Kingdom, is now the norm. This work challenges and changes the nature of the debate surrounding the role of the Catholic Church in the conflict in Northern Ireland. It will, therefore, be a key resource for scholars of Religious Studies, Catholic Theology, Religion and Violence, Peace Studies, and Twentieth Century History.

Can the law promote moral values even in pluralistic societies such as the United States? Drawing upon important federal legislation such as the Americans with Disabilities Act, legal scholar and moral theologian Cathleen Kaveny argues that it can. In conversation with thinkers as diverse as Thomas Aquinas, Pope John Paul II, and Joseph Raz, she argues that the law rightly promotes the values of autonomy and solidarity. At the same time, she cautions that wise lawmakers will not enact mandates that are too far out of step with the lived moral values of the actual community. According to Kaveny, the law is best understood as a moral teacher encouraging people to act virtuously, rather than a police officer requiring them to do so. In *Law's Virtues* Kaveny expertly applies this theoretical framework to the controversial moral-legal issues of abortion, genetics, and euthanasia. In addition, she proposes a moral analysis of the act of voting, in dialogue with the election guides issued by the US bishops. Moving beyond the culture wars, this bold and provocative volume proposes a vision of the relationship of law and morality that is realistic without being relativistic and optimistic without being utopian.

*Handbook of Catholic Social Teaching* employs a question and answer format, to better accentuate the response of the Church's message to the questions Catholics have about their social role and what the Church intends to teach about it. Written in consultation with the Pontifical Council for Justice and Peace, the Handbook should take its place alongside the Catechism of the Social Doctrine of the Church on the shelf of

informed Catholics as works that can inform what we believe and do in the public sphere.

*The Principle of Subsidiarity in Catholic Social Thought: Implications for Social Justice and Civil Society in Nigeria* provides a theoretical and practical framework for a just vision of society. It focuses on how support for individuals and social groups in Nigeria can foster the building of their communities through the practice of social justice. Social justice will ensure the building of trust across ethnic lines, challenge corruption, encourage accountability and servant leadership, protect minority tribes from larger ones, and promote grassroots self-help tribal, communal, religious, and non-governmental associations as agents of positive social change and development. These dynamics interact within a healthy federal structure that respects its constituent parts for the common good. This volume is recommended as a graduate text for courses in theology, religious education, and social philosophy, and for all interested in promoting the common good.

Provides a new understanding of the relationship between Church and State in 20th-century Costa Rica. Understanding the relationship between religion and social justice in Costa Rica involves piecing together the complex interrelationships between Church and State — between priests, popes, politics, and the people. This book does just that. Dana Sawchuk chronicles the fortunes of the country's two competing forms of labour organizations during the 1980s and demonstrates how different factions within the Church came to support either the union movement or Costa Rica's home-grown Solidarity movement. Challenging the conventional understanding of Costa Rica as a wholly peaceful and prosperous nation, and traditional interpretations of Catholic Social Teaching, this book introduces readers to a Church largely unknown outside Costa Rica. Sawchuk has carefully analyzed material from a multitude of sources — interviews, newspapers, books, and articles, as well as official Church documents, editorials, and

statements by Church representatives to provide a firmly rooted socio-economic history of the experiences of workers, and the Catholic Church's responses to workers in Costa Rica.

Education programs in social entrepreneurship helps to create and fill jobs devoted to developing the local economy, which has become a dual transfer strategy by which a virtuous circle occurs between a retrofitted educational system based on social entrepreneurship, and vocational students who are highly entrepreneurial. The Handbook of Research on Social Entrepreneurship and Solidarity Economics focuses on practical experience and theoretical models for popularizing the concept of social entrepreneurship as a critical element of economic growth. Emphasizing the ways in which social entrepreneurship benefits developing regions, small and medium enterprises, and low-income communities, this handbook of research is a pivotal reference source for professionals, academics, and graduate-level students in the fields of economics, business administration, sociology, education, politics, and international relations.

**The Popes Confront the Industrial Age, 1740-1958** Wilfrid Laurier Univ. Press

This accessible introduction covers the complete history and contemporary contexts of the church's involvement in Catholic social tradition, giving distinctive attention to the Bible, liturgy, the thought of Augustine and Aquinas, and recent theological developments. Bringing together veteran teachers of Catholic Social Teaching who have worked together on the content, this book is designed to set social questions within the Catholic tradition and contemporary life. End-of-chapter application sections address practical concerns, such as racism in the church, charity, consumerism, and talking with neighbors and coworkers about moral issues. Discussion questions, case studies, excerpts of church documents, and suggestions for further reading enhance the book's usefulness. It will work well for students of theology and ethics, particularly Catholics but also Protestants who want to know more about the Catholic social tradition.

Academic disciplines perceive tranquility and a sense of contentment differently among themselves and therefore contribute to peace-building initiatives differently. Peace is not merely a function of education or a tool that produces amicable systems, but rather a concept that educational contributions can help societies progress to a more peaceful existence. The Handbook of Research on Promoting Peace Through Practice, Academia, and the Arts aims to provide readers with a concise overview of proactive positive peace models and practices to counter the overemphasis on merely ending wars as a solution. While approaching peace-building through multiple vantage points and academic fields such as the humanities, arts, social sciences, and theology, this valuable resource promotes peace-building as a cooperative effort. This publication is a vital reference work for humanitarian workers, leaders, educators, policymakers, academicians, undergraduate and graduate-level students, and researchers.

**Sustainable Development Goals and the Catholic Church** Fordham Univ Press

What is social justice? For Friedrich Hayek, it was a mirage—a meaningless, ideological, incoherent, vacuous cliché. He believed the term should be avoided, abandoned, and allowed to die a natural death. For its proponents, social justice is a catchall term that can be used to justify any progressive-sounding government program. It endures because it venerates its champions and brands its opponents as supporters of social injustice, and thus as enemies of humankind. As an ideological marker, social justice always works best when it is not too sharply defined. In *Social Justice Isn't What You Think It Is*, Michael Novak and Paul Adams seek to clarify the true meaning of social justice and to rescue it from its ideological captors. In examining figures ranging from Antonio Rosmini, Abraham Lincoln, and Hayek, to Popes Leo XIII, John Paul II, and Francis, the authors reveal that social justice is not a synonym for “progressive” government as we have come to believe. Rather, it is a virtue rooted in Catholic social teaching and developed as an alternative to the unchecked power of the state. Almost all social workers see themselves as progressives, not conservatives. Yet many of their “best practices” aim to empower families and local communities. They stress not individual or state, but the vast social space between them. Left and right surprisingly meet. In this surprising reintroduction of its original intention, social justice represents an immensely powerful virtue for nurturing personal responsibility and building the human communities that can counter the widespread surrender to an ever-growing state.
