Academic disciplines perceive tranquility and a sense of contentment differently among themselves and therefore contribute to peace-

building initiatives differently. Peace is not merely a function of education or a tool that produces amicable systems, but rather a concept that educational contributions can help societies progress to a more peaceful existence. The Handbook of Research on Promoting Peace Through Practice, Academia, and the Arts aims to provide readers with a concise overview of proactive positive peace models and practices to counter the overemphasis on merely ending wars as a solution. While approaching peace-building through multiple vantage points and academic fields such as the humanities, arts, social sciences, and theology, this valuable resource promotes peace-building as a cooperative effort. This publication is a vital reference work for humanitarian workers, leaders, educators, policymakers, academicians, undergraduate and graduate-level students, and

researchers.

Michael Hornsby-Smith offers an overview of Catholic social thought particularly in recent decades. While drawing on official teaching such as papal encyclicals and the pastoral letters of bishops' conferences, he takes seriously the need for dialogue with secular thought. The 2006 book is organized in four stages. Part I outlines the variety of domestic and international injustices and seeks to offer a social analysis of the causes of these injustices. Part II offers a theological reflection on the characteristics of the kingdom of God which Christians are urged to seek. Part III reviews Catholic social thought in six main areas: human rights, the family and bioethical issues,

economic life, social exclusion, authentic development, and war and peace. Part IV completes the cycle with a consideration of appropriate social action responses to the injustices which the author has identified and analysed.

Knowledge of Catholic educational scholarship and research has been largely confined to specific national settings. Now is the time to bring together this scholarship. This is the first international handbook on Catholic educational scholarship and research. The unifying theme of the Handbook is ‘ Catholic Education: challenges and responses ’ in a number of international settings. In addition to analyzing the largest faith-based educational system worldwide, the book also critically

examines contemporary issues such as church-state relations and the impact of secularization and globalization.

In 2018, for the first time in nearly forty years, the United States Conference of Catholic Bishops published a pastoral letter against racism. Open Wide Our Hearts is a call to a humble and expansive love that respects human dignity and unites us all in Christ. Now, in Reading, Praying, LivingThe US Bishops' Open Wide Our Hearts, Alison Benders offers a resource designed to help parishes, RCIA programs, campus ministries, and Catholic readers unpack and grapple with this important document. Benders provides background on the social doctrine that grounds the document, describes why it ’ s so timely, and offers a plan for studying the letter, personally or as a group. In an engaging and accessible way, she walks readers

through the scriptural, theological, and moral guidance needed to form our consciences and convert our hearts. And because the work of racial healing is a journey, not an event, each section of the guide also includes questions for personal reflection and attentive discussion and prayers for spiritual renewal or reconciliation.

This book investigates the response of the Catholic Church in Northern Ireland to the conflict in the region during the late Twentieth Century. It does so through the prism of the writings of Cardinal Cahal Daly (1917-2009), the only member of the hierarchy to serve as a bishop throughout the entire conflict. This book uses the prolific writings of Cardinal Daly to create a vision of the 'Peaceable Kingdom' and demonstrate how Catholic social teaching has been used to promote peace, justice and nonviolence. It also explores the public role of the Catholic Church in situations of violence and conflict, as well as the importance for national

churches in developing a voice in the public square. Finally, the book offers a reflection on the role of Catholic social teaching in contemporary society and the ways in which the lessons of Northern Ireland can be utilised in a world where structural violence, as evidenced by austerity, and reactions to Brexit in the United Kingdom, is now the norm. This work challenges and changes the nature of the debate surrounding the role of the Catholic Church in the conflict in Northern Ireland. It will, therefore, be a key resource for scholars of Religious Studies, Catholic Theology, Religion and Violence, Peace Studies, and Twentieth Century History.

The canon for Catholic social teaching spreads to six hundred pages, yet fewer than two pages are devoted to Catholic social learning or pedagogy. In this long-needed book, Roger Bergman begins to correct that

gross imbalance. He asks: How do we educate (lead out) the faith that does justice? How is commitment to social justice provoked and sustained over a lifetime? To address these questions, Bergman weaves what he has learned from thirty years as a faith-that-does-justice educator with the best of current scholarship and historical authorities. He reflects on personal experience; the experience of Church leaders, lay activists, and university students; and the few words the tradition itself has to say about a pedagogy for justice. Catholic Social Learning explores the foundations of this pedagogy, demonstrates its practical applications, and illuminates why and how it is fundamental to Catholic higher education. Part I identifies personal encounters with the

poor and marginalized as key to stimulating a hunger and thirst for justice. Part II presents three applications of Catholic social learning: cross-cultural immersion as illustrated by Creighton University's Semestre Dominicano program; community-based service learning; and the teaching of moral exemplars such as Dorothy Day, Rev. Martin Luther King Jr., and Archbishop Oscar Romero. Part III then elucidates how a pedagogy for justice applies to the traditional liberal educational mission of the Catholic university, and how it can be put into action. Catholic Social Learning is both a valuable, practical resource for Christian educators and an important step forward in the development of a transformative pedagogy.

Education programs in social entrepreneurship helps to create and fill jobs devoted to developing the local economy, which has become a dual transfer strategy by which a virtuous circle occurs between a retrofitted educational system based on social entrepreneurship, and vocational students who are highly entrepreneurial. The Handbook of Research on Social Entrepreneurship and Solidarity Economics focuses on practical experience and theoretical models for popularizing the concept of social entrepreneurship as a critical

How can the Catholic faith help not only Catholics, but all people, build a just and flourishing society? The Catholic Church contributes first and foremost to the common good by forming the consciences of the faithful. Faith helps reason achieve an understanding of the common good and guides individuals in living justly and harmoniously. In this book, J. Brian Benestad provides a detailed, accessible introduction to Catholic social doctrine (CSD), the Church's teachings on the human person, the family, society, political life, charity, justice, and social justice. *Church, State, and Society* explains the nuanced understanding of human dignity and the common good found in the Catholic intellectual tradition. It makes the case that liberal-arts education is an essential part of the common good because it helps people

understand their dignity and all that justice requires. The author shows the influence of ancient and modern political philosophy and examines St. Augustine, St. Thomas Aquinas, papal social encyclicals, Vatican Council II, and postconciliar magisterial teaching. Benestad highlights the teachings of popes John Paul II and Benedict XVI that the attainment of the common good depends on the practice of the virtues by citizens and leaders alike. In addition to discussing the tension between CSD and liberal democracy, the book takes an in-depth look at: – Key themes of social life: the dignity of the human person, human rights, natural law, and the common good – Three principal mediating institutions of civil society: family, Church, and Catholic university – The economy, work, poverty, immigration, and the environment – The international community

and just war principles “ Excellent . . . The best treatment of Catholic Social Doctrine as a whole and a precious reminder of the intrinsically problematic character of modern democracy. ” —Perspectives on Political Science

What is social justice? For Friedrich Hayek, it was a mirage—a meaningless, ideological, incoherent, vacuous cliché . He believed the term should be avoided, abandoned, and allowed to die a natural death. For its proponents, social justice is a catchall term that can be used to justify any progressive-sounding government program. It endures because it venerates its champions and brands its opponents as supporters of social

injustice, and thus as enemies of humankind. As an ideological marker, social justice always works best when it is not too sharply defined. In *Social Justice Isn ’ t What You Think It Is*, Michael Novak and Paul Adams seek to clarify the true meaning of social justice and to rescue it from its ideological captors. In examining figures ranging from Antonio Rosmini, Abraham Lincoln, and Hayek, to Popes Leo XIII, John Paul II, and Francis, the authors reveal that social justice is not a synonym for “ progressive ” government as we have come to believe. Rather, it is a virtue rooted in Catholic social teaching and developed as an alternative to the unchecked power of the state. Almost all social workers see themselves as progressives, not

conservatives. Yet many of their “ best practices ” aim to empower families and local communities. They stress not individual or state, but the vast social space between them. Left and right surprisingly meet. In this surprising reintroduction of its original intention, social justice represents an immensely powerful virtue for nurturing personal responsibility and building the human communities that can counter the widespread surrender to an ever-growing state.

As Catholics, how are we called to make a difference in a world that can be difficult to understand? Every weekend, parishes across our global church welcome millions on their faith journeys to share joy, pain, fellowship,

and understanding. Finding a way to guide congregations through economic, cultural, and political problems is critical. We may not know exactly how Jesus would have handled specific issues of today, but we can look to his actions, words, and spirit to give us guidance for challenging situations.

Provides a new understanding of the relationship between Church and State in 20th-century Costa Rica. Understanding the relationship between religion and social justice in Costa Rica involves piecing together the complex interrelationships between Church and State — between priests, popes, politics, and the people. This book does just that. Dana Sawchuk chronicles the fortunes of the country's two competing forms of labour organizations during the 1980s and demonstrates how different factions within the Church came to support either the union movement or Costa Rica's home-grown Solidarity movement. Challenging the conventional understanding of Costa

Rica as a wholly peaceful and prosperous nation, and traditional interpretations of Catholic Social Teaching, this book introduces readers to a Church largely unknown outside Costa Rica. Sawchuk has carefully analyzed material from a multitude of sources — interviews, newspapers, books, and articles, as well as official Church documents, editorials, and statements by Church representatives to provide a firmly rooted socio-economic history of the experiences of workers, and the Catholic Church's responses to workers in Costa Rica.

The impact of the industrial revolution on the social structures of industrialized nations posed

a difficult challenge to the Catholic Church and its Popes. In the struggle for human and economic status, should the Church side with the new working class or with capitalist barons who, along with the old aristocracy, identified themselves as upholders of Christian civilization? In this history of papal social teaching, Joe Holland tells how the popes at first backed the status quo. Then, with the accession of Pope Leo XIII in 1878, a seismic shift took place. Leo's encyclical *Rerum novarum* was the first authoritative Church voice to declare that laboring people have rights--the right to fair wages, to decent living conditions, the right to organize labor unions and even to strike.

Henceforth the notion of civilization, at least for the Church, would be grounded in the lives and aspirations of working people. Modern Catholic Social Teaching traces this historic shift as it

played out in the writings of Leo and the popes who followed him: Pius X, Benedict XV, Pius XI, and Pius XII. These popes supported Leo's encyclical and even elaborated it as European history experienced the emergen
