Originally published in 1956, this masterly essay weaves together the results of

research with an independence of judgement which could only come from a long-established expert in the field of Revolutionary studies. The book examines the causes of the French Revolution and the economics involved in the weakness of France's pre-

revolutionary form of government as well as the administrative complexity which was an effective stumbling block in the way of monarchy. As well as charting key events in the revolution, the conclusion discusses the significance of the French Revolution

in the context of other revolutions in both the nineteenth and twentieth centuries.

Chartier, one of the most brilliant and productive of the younger generation of French writers and scholars now at work refashioning the Annales tradition, attempts in this book to analyze the causes of the

French revolution not simply by investigating its "cultural origins" but by pinpointing the conditions that "made is possible because conceivable." Chartier has set himself two important tasks. First, while acknowledging the seminal contribution of Daniel Mornet's <i>Les</i> <i>origens intel</i> <i>lectuelles de</i> <i>la Révolution</i> <i>française</i> (1935), he synthesizes	the half- century of scholarship that has created a sociology of culture for Revolutionary France, from education reform through widely circulated printed literature to popular expectations of government and society. Chartier goes beyond Mornet's work, not be revising that classic text but by raising questions that would	not have occurred to its author. Chartier's second contribution is to reexamine the conventional wisdom that there is a necessary link between the profound cultural transformatio n of the eighteenth century (generally characterized as the Enlightenment) and the abrupt Revolutionary rupture of 1789. Excerpt from History of the French Revolution: Its Causes and Consequences IN the little work here presented to the public, the faults of the people are more insisted upon than those of the rulers, because it is written for the former, not for the latter, and because, if the latter have a

lesson to learn from history, the former have a still greater one, and one that, if well learnt by them, will suffice for both. Despotism and tyranny are almost impossible evils in our day, but the love of liberty is so great, that the important task now is to enlighten and to regulate that love, so that, in their headlong career for the attainment of a good, the people place not themselves in the way of the very evils they seek to avoid. They have to learn, that for nations as for individuals, happiness depends

upon virtue and wisdom, and that therefore liberty, which is happiness, does not mean merely freedom from restraint, and cannot be attained through crimes.

The French Revolution Of 1789
Palala Press
Situating the French Revolution in the context of early modern globalization for the first time, this book

offers a new approach to understanding its international origins and worldwide effects. A distinguished group of contributors shows that the political culture of the Revolution emerged out of a long history of global commerce, imperial competition, and the movement of people and ideas in places as far flung as India, Egypt, Guiana, and the Caribbean. This international approach helps to explain how the Revolution fused immense idealism with territorial ambition and combined the drive for human rights with various forms of exclusion. The essays	examine topics including the role of smuggling and free trade in the origins of the French Revolution, the entwined nature of feminism and abolitionism, and the influence of the French revolutionary wars on the shape of American empire. The French Revolution in Global Perspective illuminates the dense connections among the cultural, social, and economic aspects of the French Revolution, revealing how new political forms-at once democratic and imperial, anticolonial and centralizing-were generated in and through continual	transnational exchanges and dialogues. In 1788, a year of severe drought, the crops had been poor. In addition to this, on the eve of the harvest, a terrible hail-storm burst over the region around Paris, from Normandy to Champagne, devastating sixty leagues of the most fertile territory, and causing damage to the amount of one hundred millions of francs. Winter came on, the severest that had been seen since 1709. At the close of December the Seine was frozen over from Paris to Havre, while the thermometer stood at 180 below zero. A third of the olive-trees died in Provence, and the rest suffered to such an extent that they were considered incapable of bearing fruit for two years to come. The same disaster befell Languedoc. In Vivarais, and in the Cevennes, whole forests of chestnuts had perished, along with all the grain and grass crops on the uplands. On the plain the Rhone remained in a state of overflow for two months.
