The Economics of American Art Cassell

The rapidly changing and evolving art market might appear to be chaotic to the casual observer, with new highs, potential lows, and tastes and fashions changing season to season. Economists, however, view the actions of buyers and sellers as constituting an identifiable market. They have, for some decades, studied such issues as artistic productivity and "death effects" on prices, investment returns, and on the basis of the behavior and estimated prices in auction markets. The Economics of American Art analyzes the most pervasive economic issues facing the art world, applied to the whole spectrum of American art. The book begins by looking at how a market for American art developed, how the politics of the post-war era shaped, at least in large part, the direction of American art, and how this legacy continues into contemporary art today. The book then tackles several salient, integral questions animating the American art world: Are age and "type" of artist (i.e. traditional or "innovative") related and, if so, how might they be related to productivity? Is investment in American art a remunerative endeavor compared to other investment possibilities? Do economic insights provide understanding of fakes, fraud and theft of art, particularly American art, and is it possible to prevent art crime? Is there is a boom (or a bust) in the market for contemporary American art as might be found in other markets? The ongoing evolution of American art is attended by a massive number of influences, and the economic concepts employed in this volume will complement other critical and important cultural studies of art. Both practical and accessible, The Economics of American Art will be essential for collectors, auction houses, American art experts of all kinds, museums, gallery owners and, not least, by economists with continuing scholarly interests in these matters.

Milan, 1496 and forty-four-year-old Leonardo da Vinci has a reputation for taking on commissions and failing to complete them. He is in a state of professional uncertainty and financial difficulty. For eighteen months he has been painting murals in both the Sforza Castle in Milan and the refectory of the convent of Santa Maria delle Grazie. The latter project will become the Last Supper, a complex mural that took a full three years to complete on a surface fifteen feet high by twenty feet wide. Not only had he never attempted a painting of such size, but he had no experience whatsoever in painting in the physically demanding medium of fresco. For more than five centuries the Last Supper has been an artistic, religious and cultural icon. The art historian Kenneth Clark has called it 'the keystone of European art', and for a century after its creation it was regarded as nothing less than a miraculous image. Even today, according to Clark, we regard the painting as 'more a work of nature than a work of man'. And yet there is a very human story behind this artistic 'miracle', which was created against the backdrop of momentous events both in Milan and in the life of Leonardo himself. In Leonardo and the Last Supper, Ross King tells the complete story of this creation of this mural: the adversities suffered by the artist during its execution; the experimental techniques he employed; the models for Christ and the Apostles that he used; and the numerous personalities involved - everyone from the Leonardo's young assistants to Ludovico Sforza, the Duke of Milan who commissioned the work. Ross King's new book is both a record of Leonardo da Vinci's last five years in Milan and a 'biography' of one of the most famous works of art ever painted.

In the world of law enforcement art and antiquity crime has in the past usually assumed a place of low interest and priority. That situation has now slowly begun to change on both the local and international level as criminals, encouraged in part by the record sums now being paid for art treasures, are now seeking to exploit the art market more systematically by means of theft, fraud and looting. In this collection academics and practitioners from Australasia, Europe and North America combine to examine the challenges presented to the criminal justice system by these developments. Best practice methods of detecting, investigating, prosecuting and preventing such crimes are explored. This book will be of interest and use to academics and practitioners alike in the areas of law, crime and justice.

An exploration of the world of magic that teaches the reader many tricks—including how better to understand the real world. Alex Stone--journalist and part-time conjurer--is here to amaze you. But first he had to amaze his fellow magicians. Fooling Houdini is his fascinating, revealing, and nailbiting account of his attempt to

win the 23rd World Championships of Magic, the "Magic Olympics," the largest and most prestigious competition of its kind. Alex Stone managed to qualify for entry and began preparing to astonish people who astonish others for a living. It didn't help his nerves that he was placed on the bill straight after Canadian magician Shawn Farquhar, winner of more magic competitions than anyone in history. Stone's preparations and participation provide his readers with in-depth exploration of the world of magic, and magic's meaning. He spills many professional secrets, arguing that what is important is to ask questions about what lies behind the tricks: how the mind perceives the world and parses everyday experience, about how the mind works--and why sometimes it doesn't, about why people need to believe. As we become more attuned to the limits of our own perception, we become better at distinguishing reality from illusion, at reading the angles and decoding the fine print, he says. We gain intuition and understanding into how people behave. We even learn ways to influence this behavior. This makes us less susceptible to all manner of deception. It is to gain and maintain this sixth sense that Alex Stone--a schoolboy prestidigitator--has continued performing magic well into adulthood. In Fooling Houdini he takes us into that other world, populated by truly astounding characters, and leaves us with a heightened sense of awareness about the supposedly real world.

When he retired as the chief security officer of New York City 's Metropolitan Museum of Art, John Barelli had spent the better part of forty years responsible not only for one of the richest treasure troves on the planet, but the museum 's staff, the millions of visitors, as well as American presidents, royalty, and heads of state from around the world. For the first time, John Barelli shares his experiences of the crimes that occurred on his watch; the investigations that captured thieves and recovered artwork; the lessons he learned and shared with law enforcement professionals in the United States and abroad; the accidents and near misses; and a few mysteries that were sadly never solved. He takes readers behind the scenes at the Met, introduces curators and administrators, walks the empty corridors after hours, and shares what it 's like to get the call that an ancient masterpiece has gone missing. The Metropolitan Museum covers twelve acres in the heart of Manhattan and is filled with five thousand years of work by history 's great artists known and unknown: Goya, da Vinci, Rembrandt, Warhol, Pollack, Egyptian mummies, Babylonian treasures, Colonial crafts, and Greek vases. John and a small staff of security professionals housed within the Museum were responsible for all of it. Over the years, John helped make the museum the state-of-the-art facility it is today and created a legacy in art security for decades to come. Focusing on six thefts but filled with countless stories that span the late 1970s on into the 21st century, John opens the files on thefts, shows how museum personnel along with local and sometimes Federal Agents opened investigations and more often than not caught the thief. But of ultimate importance was the recovery of the artwork, including Celtic and Egyptian gold, French tapestries, Greek sculpture, and more. At the heart of this book there will always be art—those who love it and those who take it, two groups of people that are far from mutually exclusive.

The astonishing true story of America 's most accomplished art forger: a kid from New Jersey who became a master, fooling experts and eluding the FBI for thirty years. Ten years ago, an FBI investigation in conjunction with the U.S. Attorney 's Office in the Southern District of New York was about to expose a scandal in the art world that would have been front-page news in New York and London. After a trail of fake paintings of astonishing quality led federal agents to art dealers, renowned experts, and the major auction houses, the investigation inexplicably ended, despite an abundance of evidence collected. The case was closed and the FBI file was marked "exempt from public disclosure." Now that the statute of limitations on these crimes has expired and the case appears hermetically sealed shut by the FBI, this book, Caveat Emptor, is Ken Perenyi 's confession. It is the story, in detail, of how he pulled it all off. Glamorous stories of art-world scandal have always captured the public imagination. However, not since Clifford Irving 's 1969 bestselling Fake has there been a story at all like this one. Caveat Emptor is unique in that it is the first and only book by and about America 's first and only great art forger. And unlike other forgers, Perenyi produced no paper trail, no fake provenance whatsoever; he let the paintings speak for themselves. And that they did, routinely mesmerizing the experts in mere seconds. In the tradition of Frank Abagnale 's Catch Me If You Can, and certain to be a bombshell for the major international auction houses and galleries, here is the story of America 's greatest art forger.

Bringing the lessons of Mister Rogers into the digital age Playful and practical, When You Wonder, You're Learning introduces a new generation of families to the lessons of Mister Rogers' Neighborhood. By exploring the science behind the iconic television program, the book reveals what Fred Rogers called the "tools for learning": skills and mindsets that scientists now consider essential. These tools—curiosity, creativity, collaboration, and

more—have been shown to boost everything from academic learning to children ’ s well-being, and they benefit kids of every background and age. They cost next to nothing to develop, and they hinge on the very things that make life worthwhile: self-acceptance; close, loving relationships; and a deep regard for one ’ s neighbor. When You Wonder, You’re Learning shows parents and educators the many ways they might follow in Rogers ’ footsteps, sharing his “ tools for learning ” with digital-age kids. With insights from thinkers, scientists, and teachers—many of whom worked with Rogers himself—the book is an essential exploration into how kids and their parents can excel at what Rogers taught best: being human.

If you have tattoos, who owns the rights to the imagery inked on your body? What about the photos you just shared on Instagram? And what if you are an artist, responding to the surrounding landscape of preexisting cultural forms? Most people go about their days without thinking much about intellectual property, but it shapes all aspects of contemporary life. It is a constantly moving target, articulated through a web of laws that are different from country to country, sometimes contradictory, often contested. Some protections are necessary—not only to benefit creators and inventors but also to support activities that contribute to the culture at large—yet overly broad ownership rights stifle innovation. *Is It Ours?* takes a fresh look at issues of artistic expression and creative protection as they relate to contemporary law. Exploring intellectual property, particularly copyrights, Martha Buskirk draws connections between current challenges and early debates about how something intangible could be defined as property. She examines bonds between artist and artwork, including the ways that artists or their heirs retain control over time. The text engages with fundamental questions about the interplay between authorship and ownership and the degree to which all expressions and inventions develop in response to innovations by others. Most importantly, this book argues for the necessity of sustaining a vital cultural commons.

This book explores the untold history of women, art, and crime. It has long been widely accepted that women have not played an active role in the art crime world, or if they have, it has been the part of the victim or peacemaker. *Women, Art, and Crime* overturns this understanding, as it investigates the female criminals who have destroyed, vandalised, stolen, and forged art, as well as those who have conned clients and committed white-collar crimes in their professional occupations in museums, libraries, and galleries. Whether prompted by a desire for revenge, for money, the instinct to protect a loved one, or simply as an act of quality control, this book delves into the various motivations and circumstances of women art criminals from a wide range of countries, including the UK, the USA, New Zealand, Romania, Germany, and France. Through a consideration of how we have come to perceive art crime and the gendered language associated with its documentation, this pioneering study questions why women have been left out of the discourse to date and how, by looking specifically at women, we can gain a more complete picture of art crime history.

This is the story of the sexual relationship between Michael Forest Jones, a Denver man who worked as an escort, and the Reverend Ted Haggard, founder and pastor of the New Life Church of Colorado Springs. As a rule, Mike never delved into the personal lives of his clients. He entertained celebrities, clergyman, politicians, pro-football players, and just regular guys. In 2003, a man named "Art" called Mike to set up an appointment. For almost three years, Art came to see him at least once a month. It was simply a business relationship for Mike, yet he sensed that for Art, it was more. Like many clients who were closeted, Art revealed his vulnerabilities as he struggled to deny his true desire for sexual contact and affection with a man. One day, while working out at his gym, Mike recognized "Art" preaching hate on a religious cable channel. He soon discovered that Art was actually the Reverend Ted Haggard, who, as President of the National Association of Evangelicals, influenced the daily lives of millions of believers, condemning homosexuality and advocating virulently against gay rights and same-sex unions. On November 1, 2006, Mike made public his relationship with Ted Haggard. Within days, Haggard resigned from all his positions of power, admitting to a "sexual immorality" that shook the evangelical world, right before Election Day 2006. Once Haggard was outed, Mike's clients stopped calling. He had effectively put himself out of business and put himself at risk of being trivialized and dismissed, as sex workers often are. It was Mike ’ s courage and strength of conscience that ultimately led him to come forward about the hypocrisy of Haggard ’ s life. Here is the disarming story of how one man ’ s deceit inspired another man to become a spokesperson for telling the truth and for not being ashamed of who you are.
