Disha Publications

This report presents the conceptual foundations of the OECD Programme for International Student Assessment (PISA), now in its seventh cycle of comprehensive and rigorous international surveys of student knowledge, skills and well-being. Like previous cycles, the 2018 assessment covered reading, mathematics and science, with the major focus this cycle on reading literacy, plus an evaluation of students' global competence – their ability to understand and appreciate the perspectives and world views of others. Financial literacy was also offered as an optional assessment.

Goyal's I.C.S.E English Language Model Test Papers For Class X Edition 2021 Arya Publishing Company

Recently the lives of people from age 18 to 29 have changed so dramatically that a new stage of life has developed, emerging adulthood, that is distinct from both the adolescence that precedes it and the young adulthood that comes in its wake. Rather than marrying and becoming parents in their early twenties, most people in industrialized societies now postpone these transitions until at least their late twenties, and instead spend the time in self-focused exploration as they try out different possibilities in their careers and relationships. In Emerging Adulthood, Jeffrey Jensen Arnett identifies and labels, for the first time, this period exploration, instability, possibility, self-focus, and a sustained sense of being in limbo. An increasing number of emerging adults emphasize having meaningful and satisfying work to a degree not seen in prior generations. Marrying later and exploring more casual sexual relationships have created different hopes and fears concerning long-term commitments and the differences between love and sex. Emerging adults also face the challenge of defending their non-traditional lifestyles to parents and others outside their generation who have made much more traditional choices. In contrast to previous portrayals of emerging adults, Arnett's research shows that they are particularly skilled at maintaining contradictory emotions--they are confident while still being wary, and optimistic in the face of large degrees of uncertainty. As the demographics of American youth, the American workplace, and adulthood continue to evolve, Emerging Adulthood is indispensable reading for anyone wanting to understand the face of modern America.
