Developing the Curriculum Pearson
Every major measure of students' historical understanding since 1917 has demonstrated that students do not retain, understand, or enjoy their school experiences with history. Bruce Lesh believes that this is due to the way we teach history -- lecture and memorization. Over the last fifteen years, Bruce has refined a method of teaching history that mirrors the process used by historians, where students are taught to ask questions of evidence and develop historical explanations. --from publisher description.

Problems That Unlock Student Thinking,
6-12 Pearson

In the midst of an innocent lakeside campout, five modern-day children are transported back into the time of George Washington. Humorous, historical fiction that middle graders will enjoy.

Standards and Standardization: Concepts, Methodologies, Tools, and Applications IGI Global Argues that the decline in reading by children in the United States is furthered by schools by focusing on test-taking and focusing solely on academic texts with guidance for educators on how to conteract this trend.

Grades K-3 National Academies Press
Effective communication requires a common language, a truth that applies to science and mathematics as much as it does to culture and conversation. Standards and Standardization: Concepts, Methodologies, Tools, and Applications addresses the necessity of a common system of measurement in all technical communications and endeavors, in addition to the need for common rules and guidelines for regulating such enterprises. This multivolume reference will be of practical and theoretical significance to researchers, scientists, engineers, teachers, and students in a wide array of disciplines.

One Hundred Hungry Ants Guilford Press
Now a Major Motion Picture, Starring Simon Baker, Elizabeth Debicki, and Richard Roxburgh Breath is a story of risk, of learning one's limits by challenging death. On the wild, lonely coast of Western Australia, two thrill-seeking teenage boys fall under the spell of a veteran big-wave surfer named Sando. Their mentor urges them into a regiment of danger and challenge, and the boys test themselves and each other on storm swells and over shark-haunted reefs. The boys give no thought to what they could lose, or to the demons that drive their mentor on into ever-greater danger. Venturing beyond all caution--in sports, relationships, and sex--each character approaches a point from which none of them will return undamaged. Research-Based Practice to Engage Every Learner Staff Development for Educator
Next Generation Science Standards identifies

the science all K-12 students should know.

These new standards are based on the National Research Council's A Framework for K-12 Science Education. The National Research Council, the National Science Teachers Association, the American Association for the Advancement of Science, and Achieve have partnered to create standards through a collaborative state-led process. The standards are rich in content and practice and arranged in a coherent manner across disciplines and grades to provide all students an internationally benchmarked science education. The print version of Next Generation Science Standards complements the nextgenscience.org website and: Provides an authoritative offline reference to the standards when creating lesson plans Arranged by grade level and by core discipline, making information quick and easy to find Printed in full color with a lay-flat spiral binding Allows for bookmarking, highlighting, and annotating

Enrichment clusters engage students and facilitators in student-driven, real-world learning experiences. Grouped by interest, students working like practicing professionals apply advanced content and methods to develop products and services for authentic audiences. Clusters are scheduled during the school day over an extended period of time and involve all students. This updated second edition of Enrichment Clusters provides the rationale for including this important enrichment program for all students, suggestions for creating buy-in, and a step-by-step guide for successful implementation of a self-sustaining enrichment cluster program within the context of specific schools. Included are staff development activities, suggestions for evaluation and program improvement, guidelines for developing high quality cluster experiences for teachers and students, suggested resources, and everything one needs to develop, implement, and sustain a top-quality enrichment cluster program. What They Say, What They Mean, How to Teach Them Boston ; Toronto : Pearson/Allyn and Bacon
Early childhood mathematics is vitally important for young children's present and future educational success. Research demonstrates that virtually all young children have the capability to learn and

become competent in mathematics. Furthermore, young children enjoy their early informal experiences with mathematics. Unfortunately, many children's potential in mathematics is not fully realized, especially those children who are economically disadvantaged. This is due, in part, to a lack of opportunities to learn mathematics in early childhood settings or through everyday experiences in the home and in their communities. Improvements in early childhood mathematics education can provide young children with the foundation for school success. Relying on a comprehensive review of the research, *Mathematics Learning in Early Childhood* lays out the critical areas that should be the focus of young children's early mathematics education, explores the extent to which they are currently being incorporated in early childhood settings, and identifies the changes needed to improve the quality of mathematics experiences for young children. This book serves as a call to action to improve the state of early childhood mathematics. It will be especially useful for policy makers and practitioners—those who work directly with children and their families in shaping the policies that affect the education of young children.

Marvin Redpost #5: Class President ASCD Assessment is not only a measure of student learning, but a means to student learning. This bestselling book guides you in constructing and using your own classroom assessments, including tests, quizzes, essays, and rubrics to improve student achievement. You will learn how to weave together curriculum, instruction, and learning to make assessment a more natural, useful part of teaching. Find out how to... ensure your assessments are fair, reliable, and valid; construct assessments that meet the level of cognitive demand expected of students; create select-response items and understand technology-enhanced items that are increasingly being used on assessments; use constructed-response items and develop scoring criteria such as rubrics; and analyze student results on assessments and use feedback more effectively. This second edition features updated examples that reflect the Common Core State Standards as well as other content standards and new, useful samples of teacher-friendly techniques for strengthening classroom assessment practices. No matter what grade level or subject area you teach, this practical book will become your go-to resource for designing effective assessments.

This tale of ants parading toward a picnic is “one of those rare gems capable of entertaining while it instructs” (Middlesex News). One hundred hungry ants march off single file to sample a picnic, but when the going gets too slow, they divide into two rows of fifty, then four rows of twenty-five . . . until they take so long that the picnic is gone! “The unexpected pairing of sophisticated art and light-hearted text lends this book particular distinction.”

—Publishers Weekly “The illustrations . . . use a pleasing palette and energetic lines to depict ants with highly individual characters.” —Horn Book
