All key CCNA commands at your fingertips Quick reference for CCNA exam study customized for the Cisco Networking Academy classroom Long-term reference guide for the workplace and after passing the exam Examples of how to use

the commands are listed for additional help This "CCNA Command Quick Reference" contains all of the commands that are taught in the Cisco Networking Academy Program CCNA curriculum, with examples on how to apply them to a real-world situation. This book is not meant to replace any teaching materials but rather serve as a supplementary guide to the course curriculum. As a quick reference, it will provide students and professionals easy access to the proper use of all the commands that are presented to them within the CCNA curriculum and exam. The book will cover CCNA semesters 2-4 (as the first semester does not introduce any commands.) This edition is based on the current version 3.1 of the curriculum. The book will parallel the flow of topics and structure of the online curriculum; as commands are taught in the curriculum, they will be presented in the Quick Reference, showing the following: A.) The command itself, along with keywords and optional sub-commands B.) Where it can be used (showing the prompt to give a frame of reference). Throughout the book there will be Configuration Examples given to the reader, which will summarize the previous group of commands visually by having a diagram of a network with command outputs, showing all of the commands needed to create that network, showing what commands to use, where to use them, and a summary of why we are using the commands. This allows the student to see all of the commands in one location, instead of having to flip through a bunch of different pages. Scott Empson is an instructor in the Department of Telecommunications at the Northern Alberta Institute of Technology in Edmonton, Alberta, Canada.
