Do you want to pass the CCNP Routing and Switching SWITCH certification exam? Do you want to master the subjects in the test blueprint? Do you want to become a successful Cisco network engineer? Then the CCNP SWITCH Lab workbook is your companion that will help you make your hands-on skills perfect and pass the SWITCH 300-115 exam. This lab manual was developed to help you: Understand almost every subject and Cisco IOS command in the exam syllabus. Develop and improve your hands-on configuration and troubleshooting skills. Pass the Cisco CCNP RS SWITCH 300-115 exam. Finally, this book is not that type of documents that teach you IOS commands. However, using this lab manual, you will find yourself analyzing, configuring, testing and troubleshooting in almost every lab you do. In this way, you deepen your knowledge and build up the level of hands-on experience to pass the 300-115 exam and success as a network engineer. Develop and Improve Your Hands-on Configuration and Troubleshooting Skills You do not need to invest thousands of dollars in a CCNP class to gain the same outstanding hands-on experience and high-quality knowledge provided in this lab manual. Besides, the workbook allows you to practice all networking commands related to the exam blueprint. Moreover, the current lab book teaches you how to analyze a problem, configure the solution, verify and test it. Upon the completion of the 31 labs, you'll be able to install, configure, operate, and troubleshoot switched networks. Comprehensive CCNP Lab Manual Thirty-two labs divided into seven modules to help you study and practice all exam topics. The workbook includes more than 300 pages allowing you to build up a high level of network configuration and troubleshooting skills in identifying and solving Cisco Catalyst switch problems. Each module contains dozens of tips and tricks that require only one commitment from you - pay attention and practice. You'll never get lost or wonder what you

should be doing after. It's all logically and intuitively laid out to maximize knowledge and minimize confusion. What do you need to practice the labs? You can practice almost all the labs using Cisco Catalyst 3560 series switches running at least the Cisco IOS 15.0(2) SE6 C3560-IPSERVICESK9-M image. If you do not want to use real gear, do not worry. CCNP SWITCH lab guide is easy to use with GNS3. Most of the labs have been developed using GNS3 and a Cisco VIRL IOSvL2 image. Moreover, all you need to build your labs is a Cisco IOS image file, Cisco IOSvL2 15.2 (downloaded from the official website of VIRL) and the latest version of GNS3 (Graphical Network Simulator). If you do not know how to build up a lab in GNS3, then you can search on Youtube, and find many videos that teach how to do so. Finally, you can rent a couple of Cisco switches and routers online for about five dollars per hour to practice the technologies that are not supported by GNS3. Excellent Support By investing in this CCNP certification lab manual, you will benefit from my great support. Whenever you encounter issues, contact me at the email address you will find inside the book, and I will help you as fast as I can. Your satisfaction is my goal. Therefore, by investing in this book, you will receive a high-quality product and excellent support. Small Investment with High ROI This is a high-quality lab workbook sold for a low price.
