Common Core English Language Arts in a PLC at Work™, 2nd Edition, Leader's Guide Spark Publishing Group

Coherence among components of an instructional system is key to changing teachers' instructional practices in standards-based reforms. Coherence involves working across traditional silos-or system components (e.g., curriculum, professional learning, assessment)-to integrate components to avoid fragmentation of experiences for educators and students. The authors set out to understand how districts and schools are activating various policy levers (i.e., instructional components) to drive instructional coherence and student learning in English language arts (ELA) in the Common Core era. The authors investigate the coherence of teachers' instructional systems using survey data from state-representative samples of teachers and smaller samples of district

leaders across three states: Louisiana, Massachusetts, and Rhode Island. Specifically, in spring 2019, the authors asked state-representative samples of teachers in these states about the extent to which their curricula, assessments, and other components of their instructional systems cohered with one another and aligned with state standards. The authors examine the alignment of curriculum to standards, as well as the extent to which four components of instructional systems hypothesized as key to supporting instructional coherence are aligned to standards or the curriculum: curriculum-related resources (e.g., lesson plans, pacing guides), professional development, teacher evaluation, and student assessments. Using these findings, the authors build a measure of the overall extent of coherence in teachers' ELA instructional systems.

A Little SPOT of Feelings and Emotions Educator's Guide Teacher Created Materials

Historically, teachers have exercised considerable autonomy in the day-to-day learning that occurs in their classrooms. Now, it is growing increasingly rare for a teacher to experience this type of professional freedom. In response to high-stakes testing, national and state academic content standards, and most recently the common core standards, pacing guides are one of the more recent devices schools are using to implement and monitor curriculum. The purpose of this research project is to investigate teacher opinion

toward these pacing guides. An online survey called the Pacing Guide Survey was delivered to secondary regular and special education teachers in core subject areas of mathematics, science, social studies, and language arts. The teachers were asked about whether or not they use pacing guides, their attitude and comfort level in using pacing guides, as well as: Information concerning the population of their high school, such as demographics, enrollment, and single or multiple high schools; Building level factors, such as professional development initiatives, methods of curriculum monitoring, and pacing guide development and revisions processes; teacher factors, such as years teaching, years using pacing guides, confidence in content area, and educational background. Administrators were also interviewed to form a complete picture of pacing guide development and implementation in the secondary education environment. Quantitative data were analyzed using bivariate Spearman's rank order correlation and qualitative data were analyzed

using a combination of thematic data analysis and quasi-statistical methods. Recommendations based on the data collected are: Teachers should be provided with the flexibility to address student needs in the classroom. Teacher input into pacing guide development, implementation, and revision process is necessary to ensure that student needs are addressed. Team autonomy is key and teacher teams need to be provided with the necessary support structure to provide meaningful learning experiences for their students.

A Lesson Plan for Teachers (New and Old!) Heinemann The first books to present specific guidance for teaching the Common Core State Standards Forty-three states plus the District of Columbia and the U.S. Virgin Islands have signed on to adopt the Common Core State Standards (CCSS). The need for curriculum guides to assist teachers in helping students

meet these standards has become imperative. Created by teachers, for teachers, the research-based curriculum maps in this book present a comprehensive, coherent sequence of thematic units for teaching the skills outlined in the CCSS for English language arts in Grades K-5. The maps address every standard in the CCSS, yet are flexible and adaptable to accommodate diverse teaching styles. Each grade is broken down into six units that include focus standards, suggested works, sample activities and assessments, lesson plans, and more. Teachers can use the maps to plan their year and craft their own more detailed lesson plans. Any teacher, school, or district that chooses to follow the Common Core maps can be confident that they are adhering to the standards.

Create strong and effective PLCs plus—and that plus is YOU. What makes a powerful and results-driven Professional Learning Community (PLC)? The answer is PLC plus—“plus” being the vital role teachers play in teaching and learning. Grounded in four cross-cutting themes—equity, high expectations, efficacy, and facilitation from discussion to action—the PLC+ framework supports educators in questioning practices, not just outcomes. It broadens the focus on student learning to encompass educational equity and teaching efficacy, and, in doing so, it leads educators to plan and implement PLCs that

maximize individual expertise while harnessing the power of collaborative efficacy.
