The Cell Cycle is the life cycle of the cell. Interphase is the longest phase of the cell cycle. Interphase includes three stages: G1 (cell growth), S (DNA replication), and G2 (rapid cell growth). Mitotic cell division follows. After mitosis, cytokinesis occurs.

The cell cycle is the life of a cell from the time it is first formed from a dividing parent cell until its own division into two daughter cells. Concept 12.1 Most cell division results in genetically identical daughter cells. 3.
