Does your mother call you in a panic whenever there's a storm warning for your area? Does she act as though it's her duty to alert you to every health story on the news? Have you ever been briefly out of touch with your mother only to find she's phoned everyone short of the National Guard to track you down -- or, just maybe, are you that mother? Take comfort in knowing you're not alone, as Amy Borkowsky shares more than a decade's worth of maddening phone messages from her hilariously overprotective mom. Based on the hit CD of the same name, *Amy's Answering Machine* features actual messages in which Amy's mom warns her not to wear a red bathrobe because a friend's grandson "said that red is a gang color" . . . advises her not to get a cat because "what if you finally found a nice guy and he was allergic?" . . . cautions her not to wear crepe-soled shoes because "they were just saying on the news that if you're ever in a plane crash, crepe is no good if you have to go down the slide." Amy also reveals the stories behind the messages and shares calls not available on CD, each one brimming with the worry and annoying comments only a loving mother could dish out. The same warnings and suggestions that had Amy cringing are sure to have you doubled over with laughter. But before you turn the page, take some advice from Amy's mom: Make sure you have plenty of reading light, because squinting causes crow's feet.

Fed up with the high tolls charged by your ordinary telephone service? If you're itching to cut the copper cord with your costly, traditional phone service, you need Talk is Cheap, the new, easy-to-understand guide to understanding and using Voice over Internet Protocol (VoIP) and other Internet telephone options. Technologies such as VoIP are gaining a great deal of attention these days as more people switch from standard telephone service to phone service via the Internet. But while the cost savings are outstanding, there are some issues with Internet telephony that you should know about. Are the connections reliable? Is the quality comparable? Will it include 911 services? James Gaskin's Talk is Cheap addresses these issues and many more by explaining how to make the switch and what the tradeoffs will be if you opt for Internet telephony over traditional phone services. Talk is Cheap focuses on the increasingly popular services from Vonage, which uses VoIP, and Skype--a free service that operates as a peer-to-peer (P2P) network with the ability to turn any PC, Mac, or Pocket PC into a telephone. The book explains your options; explores the background behind, the workings of, and differences between VoIP and P2P networks; and discusses the advantages and drawbacks of both technologies (including service offerings, quality, capabilities, completion rates, and more). Talk is Cheap then goes into detail on what you can expect in Internet service from traditional phone companies such as Verizon and AT&T. In addition, you will learn more advanced techniques, including how to turn your Palm or Pocket PC into an Internet phone and how to work with Wi-Fi phones and videophones. A straightforward, quick introduction to the ins and outs of using Internet telephone services, this book provides everything you need to make informed telephone decisions--whether you're thinking about the switch from traditional phone service or have already made it and want to get the most out of your new Internet telephone.
