Does your mother call you in a panic whenever there's a storm warning for your area? Does she act as though it's her duty to alert you to every health story on the news? Have you ever been briefly out of touch with your mother only to find she's phoned everyone short of the National Guard to track you down -- or, just maybe, are you that mother? Take comfort in knowing you're not alone, as Amy Borkowsky shares more than a decade's worth of maddening phone messages from her hilariously overprotective mom. Based on the hit CD of the same name, Amy's Answering Machine features actual messages in which Amy's mom warns her not to wear a red bathrobe because a friend's grandson "said that red is a gang color"...advises her not to get a cat because "what if you finally found a nice guy and he was allergic?"...cautions her not to wear crepe-soled shoes because "they were just saying on the news that if you're ever in a plane crash, crepe is no good if you have to go down the slide." Amy also reveals the stories behind the messages and shares calls not available on CD, each one brimming with the worry and annoying comments only a loving mother could dish out. The same warnings and suggestions that had Amy cringing are sure to have you doubled over with laughter. But before you turn the page, take some advice from Amy's mom: Make sure you have plenty of reading light, because squinting causes crow's feet.

This philosophical and sociological look at friendship and happiness begins with a review of Aristotle's three categories of friendship—friends of utility, friends of pleasure and friends of the good. Modern variations—casual friends, close friends, best friends—are described, along with the growing phenomena of virtual friendships and cyber socialization in the Internet age.

Inspired in part by Bertrand Russell's *The Conquest of Happiness*, the authors propose that conquering unhappiness is key to achieving the self-satisfaction Russell called zest and Aristotle called eudaimonia or thriving by our own efforts.

Metonymy and Language presents a new theory of language and

communication in which the central focus is on the concept of metonymy, the recognition of partial matches and overlaps. Through the use of original data sets and rigorous primary research, Denroche characterizes metonymy as key to understanding why language is so 'fit for purpose' and how it achieves such great subtlety and flexibility. This study develops the notion of 'metonymic competence' and demonstrates that metonymic behavior is often pursued for its own sake in recreational activities, such as quizzes, puzzles and play, and shows the possible impact of the application of metonymic processing theory to professional fields, such as language teaching and translator training. Furthermore, it proposes a research approach with metonymy at its center, 'metonymics,' which Denroche suggests could provide a powerful framework for addressing issues in numerous fields of practice in the arts and sciences.
