Electronic Media connects the traditional world of broadcasting with the contemporary universe of digital electronic media. It provides a synopsis of the beginnings of electronic media in broadcasting, and the subsequent advancements

into digital media. Underlying the structure of the book is a "See It Then, See It Now, See It Later" approach that focuses on how past innovations lay the groundwork for changing trends in technology, providing the opportunity and demand for change in both broadcasting and digital media. FYI and Zoom-In boxes point to further information, tying together the immediate and long-ranging issues surrounding electronic media. Career Tracks feature the experiences of industry experts and share tips in how to approach this challenging industry. Does your mother call you in a panic whenever there's a storm warning for your area? Does she act as though it's her duty to alert you to every health story on the news? Have you ever been briefly out of touch with your mother only to find she's phoned everyone short of the National Guard to track you down -- or, just maybe, are you that mother? Take comfort in knowing you're not alone, as Amy Borkowsky shares more than a decade's worth of maddening phone messages from her hilariously overprotective mom. Based on the hit CD of the same name, Amy's Answering Machine features actual messages in which Amy's mom warns her not to wear a red bathrobe because a friend's grandson "said that red is a gang color"...advises her not to get a cat because "what if you finally found a nice guy and he was allergic?"...cautions her not to wear crepe-soled shoes because "they were just saying on the news that if you're ever in a plane crash, crepe is no good if you have to go down the slide." Amy also reveals the stories behind the messages and shares calls not available on CD, each one brimming with the worry and annoying comments only a loving mother could dish out. The same warnings and suggestions that had Amy cringing are

sure to have you doubled over with laughter. But before you turn the page, take some advice from Amy's mom: Make sure you have plenty of reading light, because squinting causes crow's feet.

Metonymy and Language presents a new theory of language and communication in which the central focus is on the concept of metonymy, the recognition of partial matches and overlaps.

Through the use of original data sets and rigorous primary research, Denroche characterizes metonymy as key to understanding why language is so 'fit for purpose' and how it achieves such great subtlety and flexibility. This study develops the notion of 'metonymic competence' and demonstrates that metonymic behavior is often pursued for its own sake in recreational activities, such as quizzes, puzzles and play, and shows the possible impact of the application of metonymic processing theory to professional fields, such as language teaching and translator training.

Furthermore, it proposes a research approach with metonymy at its center, 'metonymics,' which Denroche suggests could provide a powerful framework for addressing issues in numerous fields of practice in the arts and sciences.
