Design and Validation of Research Tools and Methodologies Taylor & Francis

Computer technology has become an essential part of all our lives, and the legal profession is no exception. For more than 25 years, the annual JURIX conference has provided an international forum for academics and practitioners working at the cutting edge of research into and the application of the interface between law and computer technologies. This book presents the proceedings of the 28th International Conference on Legal Knowledge and Information Systems (JURIX 2015), which took place in Braga, Portugal in December 2015. The book contains 14 full papers, nine short papers and nine posters delivered at the conference. These address a wide range of topics in legal informatics, and fall into three main subject areas: theory and foundations of AI and law, focusing on themes such as argumentation, reasoning, and evidence; technology of AI and law, which presents technological advancements and solutions; and applications of AI and law, describing implementations of AI and law technology in real world systems. The book offers an overview of the ways in which current information technology is relevant to the practice of law, and will be of interest to all those whose work involves legal theory, argumentation and practice.

In academia, the quality of research is intricately linked to the methods and tools used in the research process. Linguistics, a field at the forefront of deciphering the intricacies of language, faces a critical challenge in ensuring the robustness and reliability of its research. Without proper attention to the design and validation of research tools, the foundations of linguistic knowledge are at risk of becoming shaky, undermining the very essence of scientific inquiry. *Design and Validation of Research Tools and Methodologies* is a beacon of hope in the field of linguistic scholarship, enabling a comprehensive solution to the critical issue of research tool design and validation. It presents an extensive exploration of current and groundbreaking methodologies in linguistics, equipping researchers with the knowledge and tools they need to conduct rigorous and dependable research. This book is devoted to the needs of scholars, academics, and practitioners, which brings together diverse perspectives, case studies, and innovative methods. It opens a vibrant dialogue in the linguistic community and paves the way for future advancements in the field.

Introduction to Statistics and Data Analysis Springer
Modes and models of learning and instruction have shown a significant shift from yesterday's conventional learning and teaching given this era's current educational and social contexts. Learners are no longer learning and communicating with human-generated, computed, and mediated—or traditional—learning and instructional practices, paving the way for machine-facilitated communication, learning, and teaching tools. Learning and instruction, communication and information exchange, as well as gathering, coding, analyzing, and synthesizing data have proven to be in need of even more innovative technology-moderated tools. *Applications of Machine Learning and Artificial Intelligence in Education* focuses on the parameters of remote learning, machine learning, deep learning, and artificial intelligence under 21st-century learning and instructional contexts. Covering topics such as data coding and social networking technology, it is ideal for learners with an interest in the deep learning discipline, educators, educational technologists, instructional designers, and data

evaluators, as well as special interest groups (SGIs) in the discipline.

STATISTICAL METHODS FOR PSYCHOLOGY, 8E, International Edition surveys the statistical techniques commonly used in the behavioral and social sciences, particularly psychology and education. To help students gain a better understanding of the specific statistical hypothesis tests that are covered throughout the text, author David Howell emphasizes conceptual understanding. This Eighth Edition continues to focus students on two key themes that are the cornerstones of this book's success: the importance of looking at the data before beginning a hypothesis test, and the importance of knowing the relationship between the statistical test in use and the theoretical questions being asked by the experiment. New and expanded topics—reflecting the evolving realm of statistical methods—include effect size, meta-analysis, and treatment of missing data.

This innovative volume provides a new analytic framework for understanding how meaning-making resources are deployed in images designed for knowledge building in school science. The framework enables analyses of science images from the perspectives of both their complexity and recognizability. Complexity deals with the technical and abstract knowledge of school science (technicality), evaluative dispositions in relation to that knowledge (iconization) and the condensation of the technical and dispositional meanings as 'synoptic eye-fuls' in discipline-specific infographics (aggregation). Recognizability concerns the relationship between the appearance of phenomena in reality and the reconfiguration of this reality in images (congruence), the perceptibility or discernibility of the features and contexts of phenomena in images (explicitness), and how images engage their viewers (affiliation). The framework is illustrated by more than 100 images in colour in the e-book and black and white in the paper version and will inform research into multimodal literacy pedagogy that incorporates an understanding of the role of images in the teaching and learning of school science. This book will be of particular interest to scholars in multimodality, semiotics, literacy education and science education.

The teaching of culture and interculturality is today viewed as an integral part of foreign language education. This book presents insights from recent research on the role of culture in second/foreign and heritage language education. It contains 14 chapters including an introductory chapter that discusses diachronically the evolving notion of culture and how the sociocultural view of culture as a complex and dynamic concept informs language teaching and language learning research. The chapters following the introduction are organised in four parts focusing on: 1) the teacher's role in integrated language and culture learning; 2) the interrelationship between culture, identity, and language learning and use; 3) the effect of culture on learner characteristics which impact language learning processes and outcomes; and 4) curriculum development aimed at fostering language and culture learning. The chapters in Parts 1 to 3 present contributions from current research - either in the form of the authors' original studies or comprehensive reviews of relevant essential research - which bears important implications for curricular practice in foreign language and language teacher education. This close link between research, theory and practice is also maintained in the two chapters in Part 4, which present developmental projects based on well-grounded theoretical frameworks.

Now in its second edition, *Teaching and Researching Language Learning Strategies: Self-Regulation in Context* charts the field systematically and coherently for the benefit of language learning practitioners, students, and researchers. This volume carries on the author's tradition of linking theoretical insights with readability and practical utility and offers an enhanced Strategic Self-Regulation Model. It is enriched by many new features, such as the first-ever major content analysis of published learning strategy definitions, leading to a long-awaited, encompassing strategy definition that, to a significant degree, brings order out of chaos in the strategy field. Rebecca L. Oxford provides an intensive discussion of self-regulation, agency, and related factors as the "soul of learning strategies." She ushers the strategy field into the twenty-first century with the first in-depth treatment of strategies and complexity theory. A major section is devoted to applications of learning strategies in all language skill areas and in grammar and vocabulary. The last chapter presents innovations for strategy instruction, such as ways to deepen and differentiate strategy instruction to meet individual needs; a useful, scenario-based emotion regulation questionnaire; insights on new research methods; and results of two strategy instruction meta-analyses. This revised edition includes in-depth questions, tasks, and projects for readers in every

chapter. This is the ideal textbook for upper-level undergraduate and graduate courses in TESOL, ELT, education, linguistics, and psychology.
