LINGUISTICS FOR EVERYONE: AN INTRODUCTION, Second Edition, will capture the interest of all students, regardless of major, and offer them a thorough, engaging introduction to the science of language. To achieve this goal, the authors devised a unique arrangement of chapters that distinguishes this book from conventional introductory linguistics textbooks. Without sacrificing rigor, the authors focus on larger themes rather than on technical details or formal analysis. The book opens with a strong introductory chapter addressing basics such as how to define language, prescriptive versus descriptive grammar, differences between the human language system and other animal communication systems, and so on. The second chapter, devoted to language, mind, and brain, addresses both psycholinguistic and neurolinguistic evidence for humans' innate capacity for language. To address core linguistics areas in depth, there are two chapters each on phonetics and phonology, morphology, syntax, and semantics. Throughout the text, special features relate the study of linguistics to the language we use in the real world and every chapter includes innovative and varied activities that review and practice the content and offer your students many opportunities to apply the knowledge in their own lives. Beginnings & Beyond: Foundations in Early Childhood Education

Cengage Learning

Many foreign language departments have developed innovative curricula with the goal of overcoming two-tiered structures that often separate language instruction at the lower levels from upper division content coursework. However, language departments rarely extend their articulation efforts to include pre-collegiate experiences even though recent educational reforms have significantly altered not only the skill sets, but also needs and expectations of students entering college. In addition to attending to vertical interfaces, successful language curricula integrate horizontally with academic and professional units outside the language department. This volume furthers the existing knowledge base on the collegiate foreign language curriculum by providing a K-20 perspective on the achievement of curricular coherence. It is intended for a broad audience, but in particular language program directors, to help them address the critical transitions that language learners face during their progression from public schools through undergraduate programs and into graduate education. Early Childhood Experiences in Language Arts Cengage Learning

Integrating the arts in foreign language curricula enables us to connect language to other semiotic spaces and cultural productions such as theater, the fine arts, art history, architecture, music, museum cultures, and literature. By embracing the notion of texts as socially, historically, and culturally situated practices, of which the written text is but one product, we can conjoin the basic literacy of reading and writing with a broader range of visual, aural, and spatial signifying acts. Understood in this way, the arts become a source and stimulus for not only textual analysis and communicative exchange, but also subjective response and emotional experience. In other words, by interacting with art--evaluating, interpreting, experiencing, embodying, and even producing it, in any one of its many forms--learners can understand culture as a process in which they are motivated to participate as subjects. This process can deepen the cognitive, social, aesthetic, and subjective dimensions of language learning. While many new instructors have interest or expertise in the use of one or more art forms, we cannot assume that they know how to incorporate the arts in their lesson plans. Our teacher training programs, therefore, have the potential to be transformative sites, where the concept of foreign language literacy and literacies takes shape through effectively varied pedagogical practices. This volume will not only provide a concrete vision for approaches to materials and learning goals, but also suggest directions for teacher training and long-term professional development for integrating the arts.
