The sparkling memoir of an idyllic, bohemian childhood in an enchanted Tuscan castle between World War I and World War II. When Kinta Beevor was five, her father,

the painter Aubrey Waterfield, bought the sixteenth-century Fortezza della Brunella in the Tuscan village of Aulla. There her parents were part of a vibrant artistic community that included Aldous Huxley, Bernard Berenson, and D. H. Lawrence. Meanwhile, Kinta and her brother explored the glorious countryside, participated in the region's many seasonal rites and rituals, and came to know and love the charming, resilient Italian people. With the coming of World War II the family had to leave Aulla; years later, though, Kinta would return to witness

the courage and skill of the Tuscan people as they rebuilt their lives. Lyrical and witty, *A Tuscan Childhood* is alive with the timeless splendour of Italy. [Lulu.com](https://www.lulu.com)

remembered as the
original "Home of the
Atlantic Seabees."
During World War II,
100 battalions as well**

as dozens of other U.S. Navy "Builder-Fighter" units were formed, outfitted, trained, and prepared for overseas deployment. Here, in the first photographic history of the base, is the story of the men and women who came to Davisville and their legacy of superb accomplishments in the service of their country. Established on February 27, 1942, the base was designated to manufacture and ship

overseas materials and equipment and to outfit and embark construction battalions and other naval units. Between 1942 and 1994, when the base was closed, the Seabees participated in every war involving the United States. The Quonset Hut and the Davisville Pontoons were both developed at the Davisville Seabee Center. The base has schooled and trained thousands of officers

and tens of thousands of Seabees.

In 1942, the navy sought a location for an advance base on the West Coast to ship construction materiel, equipment, and men into World War II's Pacific theater. Port Hueneme's deepwater harbor, rail system, and rural setting made it the ideal site from which to send 20 million measurement tons of war materiel and a quarter of a million men onto island

specks that later became headlines: Guadalcanal, Tarawa, Iwo Jima, Okinawa, and the Philippines. Seabees later deployed from Port Hueneme to serve in the Korean, Vietnam, Desert Shield/Desert Storm, and Iraqi conflicts, as well as in peacetime, for more than 60 years. Charged with building air bases, ports, combat camps, hospitals, and other support facilities as part of military and humanitarian efforts around the world, the Seabees remain at home in Port Hueneme.

Every aspect of the common sailor's life in the Union navy--from recruiting, clothing, training, shipboard routine, entertainment, and wages to diet, health, and combat experience--is addressed in this study, the first to examine the subject in rich detail. The wealth of new facts it provides allows the reader to take a fresh look at nineteenth-century social history, including issues like racial integration in the military. As he examines daily life in the Union navy, Dennis

Ringle also calls attention to the enlisted sailor's enormous contributions to the development of the U.S. Navy as it moved from wood and sail to steam and iron. A marine engineer with more than twenty years of naval experience, Ringle describes the lives of the steam engineers whose work later proved critical to the success of the ironclad monitors and the development of the powerful predreadnought warships. His focus is on the sailors assigned to the western river vessels, the ships enforcing the blockade, and those dispatched to destroy

Confederate commerce raiders. To reconstruct daily life, he draws on a large number of published and unpublished diaries, journals, and letters. To put the information in context, he compares the sailor's life to that of a soldier's, including health conditions to explain why, for example, fewer sailors died from disease than soldiers. Ringle's efforts to gain respect for the courageous Union sailors who helped save the nation are certain to bring them recognition, just as Bell Wiley's landmark studies Billy Yank and Johnny Reb did for the Civil War soldiers.

The Seabees Speak Naval Inst Press

Ben Moreell was the first non-Naval Academy graduate to be awarded the four stars of an Admiral. He is still the only staff corps officer to be promoted to Admiral. The history of the U.S. Navy Seabees and the biography of Admiral Ben Moreell are inseparable. Immediately after the Japanese attack on Pearl Harbor, he began forming the construction units that ultimately became known as the Seabees. The first

battalion of Seabees deployed from the U.S. on 27 Jan. '42. This instantaneous effort to recruit, train, organize, equip and deploy a military unit is still recognized as an amazing achievement. Ultimately over 300,000 Seabees were involved during WW II. The Seabees built and operated the equipment needed to get troops, equipment and supplies ashore in every amphibious landing of WW II. Beginning in North Africa and continuing to Sicily, Italy and Normandy, they were an essential element of the invasions of Europe. But their island hopping campaign throughout the Pacific with the Marines really made their reputation. They participated in every Pacific invasion together with the Marines with the exception of Guadalcanal, where they arrived about three weeks after the First Marines went ashore. Following the invasions, the Seabees built every sort of facility required by the Marines and the Navy; piers, runways, fuel storage, hospitals, ammo storage, dry docks, and more. The accomplishments of the Seabees continued through Korea, Viet Nam and the middle east. The unique aspect of the fighter-builder Seabees generated a need for a command structure that could respond to both elements at any time. Recognizing this critical feature Moreell achieved a major change to Navy Regulations and obtained the authorization for Civil Engineer Corps officers to be given command of the

Seabees. They are still the only staff corps officers who enjoy the privilege of commanding fleet units. Moreell also directed the massive mobilization and construction effort for the Navy and Marine Corps throughout the war as well as dealing with unions, congress, manufacturers, and an ever growing federal bureaucracy. His open and honest dealings were recognized by all and contributed to the successful accomplishments of the Bureau of Yards and Docks

during that time. But it Seabees remain his crowning military achievement. Their success in W W II was recognized by Fleet Admiral Chester Nimitz in a Seabee birthday anniversary letter to Moreell in which he stated, "...without them we could not have beaten the (Japanese)." An advisor to four Presidents, Ben Moreell's actions forever placed the Civil Engineer Corps and the Seabees solidly in Navy history and tradition.

Born in the hellish aftermath of Pearl Harbor, the Seabees began as barely armed civilians with no military training. They had an average age of 35. GI's would joke, "Never hit a Seabee, for his son might be a Marine." America's bulldozing, jungle-hacking, Jap-cracking Construction Battalion or the Seabees (C.B.'s) soon proved themselves miracle-construction-workers in seemingly impassable combat zones. Before World

War 2, Marines were the ones to get their first, but the need for roads in the muddy battlefields of the Pacific meant that claim would pass to the Construction Battalion. Their early motto was "Can Do!"

A Sailor's History of the U.S.

Navy

Arcadia Publishing
In June 1942, the U.S. Navy established an advance base depot in Gulfport because of its uncrowded deepwater port, rail

access, open land, and a tepid climate that permitted training and open port facilities year-round. The base became the southern home for the Seabees and was ideal for shipping construction materiel and men to the Caribbean or the Pacific via the Panama Canal. Since the base reopened in March 1966, Seabees have deployed from Gulfport to serve during major conflicts as well as in peacetime. Seabees from Gulfport played an integral part in Operation Desert Shield/Desert Storm and more recently deployed to Afghanistan and Iraq to assist in local construction efforts to rebuild both countries. Seabees assist thousands each year in international humanitarian

projects while still calling Gulfport home.

Ancient Greek Beliefs explores the mysteries of the ancient myths and religious beliefs of a great people. The text is divided into three sections, Greek mythology, the ancient Greeks, and conclusions. A brief history and lengthy glossary are included. The book is designed as a basic text for the introduction to ancient Greek mythology and beliefs, and the text muses about the religious lessons we might learn from them. It contains abridged stories of Greek mythology, including the extant Greek plays, and considers portions of the works of

the great writers, including Aeschylus, Euripides Hesiod, Homer, Plato, and Sophocles. It opens a comprehensive window into the lives of these great ancient people.
