MAH CET MBA/MMS Entrance Guide | 8 Full-length Mock Tests + 4 Sectional Tests (2200+ Solved Questions) Kluwer Law International B.V.

Moving beyond the ‘ Web 2.0 ’ and ‘ digital native ’ rhetoric, this book addresses the complex experiences of learners of English as a foreign language (EFL) in a world embedded with interactive and participatory technologies. Adopting a sociocultural perspective, it investigates EFL learners ’ behaviours concerning digital technology, and guides exploration into their contextually mediated choices and learning practices in the ‘ 2.0 ’ era. The argument is developed on the basis of the findings of a mixed sequential study that focused on 1485 Chinese undergraduates ’ use and non-use of online tools and applications outside the English classroom. Particular attention is paid to the role of context and agency when understanding their learning choices and behaviours in the context of digital technology. In particular, the book acknowledges the explanatory power of agency in the minority instances of ‘ good practices ’ among these EFL learners. At the

same time it demonstrates that for most learners, use of the current web is limited and mostly non-interactive. The barriers to '2.0' transfer are largely contextual and the so-called 'communicative opportunities' and 'participatory culture' in particular did not fit into the learners' sociocultural context of (language) learning. Overall, the compelling argument proposes that the technology-facilitated changes in EFL practices are a 'bottom up' process that is taking place in day-to-day situations and constrained by the learning context within which the learner is situated. Based on these arguments, the book provides a framework that challenges the existing beliefs about (language) learning with online technology, and that contributes to our understanding of how context mediates EFL learners' behaviours surrounding digital technologies. It is a valuable resource for teachers, researchers and policy makers, providing them with insights into using digital technology to stimulate 'good learning practices' outside the classroom.

Maharashtra CET-MBA 2021 with Solved Papers & Mock Papers Arihant Publications India limited

In developed countries like the US, Germany and the UK it has been observed that workers who perform non-routine activities, either cognitive or manual, have benefited in terms of employment and income, while those performing routinary tasks have seen their job prospects and wages decline. This has led to a polarization of the labor markets and to a decrease in certain measures of inequality. This phenomenon has been attributed to task-biased technological change (TBTC), which differs from the skilled biased technological change in the fact that not only highly skilled workers have benefited from technology advancement. This book presents evidence of how digitalization and task-biased technological change are affecting the labor markets of different regions of the world and

examines the factors that cause this inequality among nations. It examines recent issues around the effect of task-biased technological change on labor markets and the economy in general, with a comparison of different countries in Central and Eastern Europe, North America, and Latin America, as well as in other regions of the world. The incorporation of the abovementioned regions presents relevant particularities for the subject matter addressed in the book. The book also considers questions such as how labor market effects differ by gender and what the impact of digital skills on employment, inequalities and public policies might be. In so doing, it identifies the advances, opportunities, and changes that have taken place, while also making public policy proposals. The main market for the book is the global community of graduate students and researchers in the field of economics and, specifically, in the study of labor markets. New technologies are changing the way that tax administrations, taxpayers and their advisers interact, leading to a reduction in the compliance cost for taxpayers, a level playing field for large and small businesses, and fewer opportunities to engage in aggressive tax practices. Although entering a new world where processes are supported by machines inevitably disrupts traditional ways of working, the contributors to this indispensable book reveal the enormous potential of 'tax technology' to positively transform tax compliance, clearly showing both government and business how to manage the transition from the old to the new. With detailed treatment of the technology available in the tax field, the authors describe how to secure its benefits in such ways as the following: electronic balance sheets and invoices; automated transmission to tax authorities; innovative analytics applications; blockchain in tax law processes; process mining in VAT; real-time reporting with cryptography; and meeting the challenges to taxpayers' rights to privacy and personal data protection. The contributions draw on an international conference held under the auspices of the Digital Economy Taxation Network at the Vienna University of Economics and Business in December 2020. The perspective throughout focuses on how to achieve better tax compliance at a lower cost. For this reason, this full-scale, practical guide on how to adapt tax law to new technologies and how to apply tax tech processes in practice will be welcomed by tax practitioners, tax administrations, and academics across the entire tax community.

Professeur, chercheur, directeur de centre, doyen et recteur, Yves Pouillet s' est illustré dans toutes les étapes et fonctions d' une carrière universitaire bien remplie, marquant des générations d' étudiants, de chercheurs, de collègues et de pairs. Spécialiste éminent et incontournable du droit de l' internet et des technologies de l' information et de la communication, il en est aussi l'un des précurseurs en fondant dès 1979 un des

premiers centres de recherche européens en la matière. Par cet ouvrage, collègues, amis, anciens doctorants rendent hommage à l' une des plus belles plumes de la discipline, en lui offrant leurs réflexions sur l' influence réciproque du droit et de la technologie. Leurs contributions démontrent l' étendue de l' expertise et des réseaux européens et internationaux d' Yves Pouillet. Elles s' articulent autour de trois axes qui furent autant de perspectives dans lesquelles il a inscrit sa recherche : le droit, les normes et les libertés. La richesse de ce volume témoigne de son attention à l' humain, des amitiés qu' il a nouées, mais aussi des sillons qu' il a tracés en droit des technologies de l' information et de la communication, sillons dans lesquels a poussé une forêt luxuriante, toujours fertile. C' est l' héritage d' un grand penseur, d' un vénérable universitaire. ===== Yves Pouillet has not merely served but excelled in all functions of the University world. Whether as professor, researcher, director of a research centre or as dean and rector, he has left a lasting impression in the minds of generations of students, researchers, colleagues and peers. He is a preeminent expert on the law of Internet and Information and Communications Technologies who, already in 1979, pioneered one of the first European research centres in the field. This volume is a tribute to Yves Pouillet from colleagues, friends, former PhD researchers, offering their reflections on the reciprocal influence of law and technology. These contributions highlight both the range of expertise and the extent of the European and international networks he has nourished. They address the three main research axes Yves Pouillet has developed through the years: law, norms and freedoms. The authors of this volume pay homage to a mentor, a friend, but above all to an exceptional researcher who has sown countless seeds in the field, enabling a luxurious landscape to grow and become a source of inspiration for many scholars. This is the heritage of a genuine

thinker, a real academic.
