Examines how states, schools, and postsecondary institutions might best help

improve college readiness and completion.

Though more students are entering college, many drop out, especially those who are low income and/or of color. To address this problem, educational stakeholders have focused on the concept of “college readiness,” or the preparation a student needs to succeed in college. However, what it means to be college ready and how to help more students become ready are questions without clear answers. By way of historical and contemporary analyses, this book uses California as a case study to demonstrate how the state has endeavored to make postsecondary opportunity accessible for all students. The contributors

also explore the challenges that remain and address what states and schools can do to improve college readiness and completion. William G. Tierney is Wilbur-Kieffer Professor of Higher Education at the University of Southern California and the editor of many books, including *Governance and the Public Good*; *Preparing for College: Nine Elements of Effective Outreach* (with Zoe B. Corwin and Julia E. Colyar); *Increasing Access to College: Extending Possibilities for All Students* (with Linda Serra Hagedorn); and *Faculty Work in Schools of Education: Rethinking Roles and Rewards for the Twenty-first Century*, all published by SUNY Press. Julia C. Duncheon is a doctoral candidate in urban education policy at the University of Southern California. *The College Fear Factor* Cisco Systems Assessment in Health Professions Education, 2nd Edition, provides a comprehensive guide for educators in the health professions—medicine, dentistry, nursing, pharmacy and allied health fields. This second edition has been extensively revised and updated by leaders in the field. Part I of the book presents an introduction to assessment fundamentals and their theoretical underpinnings from the perspective of the health

professions. Part II covers specific assessment methods, with a focus on validity, best practices, challenges, and practical guidelines for the effective implementation of successful assessment programs. Part III addresses special topics and recent innovative approaches, including narrative assessment, situational judgment tests, programmatic assessment, mastery learning settings, and the Key Features approach. This accessible text addresses the essential concepts for the health professions educator and provides the background needed to understand, interpret, develop, and effectively implement assessment methods.

Although more and more students have the test scores and transcripts to get into college, far too many are struggling once they get there. These students are surprised to find that college coursework demands so much more of them than high school. For the first time, they are asked to think deeply, write extensively, document assertions, solve non-routine problems, apply concepts, and accept unvarnished critiques of their work. *College Knowledge* confronts this problem by looking at the disconnect between what high schools do and what colleges expect and proposes a

solution by identifying what students need to know and be able to do in order to succeed. The book is based on an extensive three-year project sponsored by the Association of American Universities in partnership with The Pew Charitable Trusts. This landmark research identified what it takes to succeed in entry-level university courses. Based on the project's findings - and interviews with students, faculty, and staff - this groundbreaking book delineates the cognitive skills and subject area knowledge that college-bound students need to master in order to succeed in today's colleges and universities. These Standards for Success cover the major subject areas of English, mathematics, natural sciences, social sciences, second languages, and the arts. *Resources in Education* Harvard University Press

For much of the twentieth century, the definition of success for most community colleges revolved around student retention and graduation. This definition no longer works—if it ever did. In *Student Success in the Community College: What Really Works?* respected community college leaders, researchers, and innovators argue

that student success is about redesigning community colleges in a manner that is consistent with each college's mission, goals, student population, and resources. Concluding that there is no one-size-fits-all approach to increasing student success, chapter authors analyze national, state, and regional efforts to increase student success; identify principles institutions can use to frame student success initiatives; and outline specific actions community colleges can take to increase student—and institutional—success. *Student Success in the Community College: What Really Works?* also provides concrete examples of effective student success initiatives in a variety of community college settings. *Research in Education* Cengage Learning Change leaders at all levels of the university will need to grapple with both the content and the process of change. This book tackles the question of how universities can lead change from within. [Tutor Evaluation by Self-Assessment for Chabot College Tutorial Instructional Program](#) Tutor Evaluation by Self-Assessment for Chabot College Tutorial Instructional Program Rebecca D. Cox draws on five years of interviews and observations at community

colleges, where she shows how students and their instructors misunderstand and ultimately fail one another, despite good intentions. Eye-opening even for experienced faculty and administrators, *The College Fear Factor* reveals how the traditional college culture can actually pose obstacles to students' success, and suggests strategies for effectively explaining academic expectations. [Community College Outcomes](#) John Wiley & Sons American higher education needs a major reframing of student learning outcomes assessment Dynamic changes are underway in American higher education. New providers, emerging technologies, cost concerns, student debt, and nagging doubts about quality all call out the need for institutions to show evidence of student learning. From scholars at the National Institute for Learning Outcomes Assessment (NILOA), *Using Evidence of Student Learning to Improve Higher Education* presents a reframed conception and approach to student learning outcomes assessment. The authors explain why it is counterproductive to view collecting and using evidence of student accomplishment as primarily a compliance activity. Today's circumstances demand a fresh and more strategic approach to the processes by which

evidence about student learning is obtained and used to inform efforts to improve teaching, learning, and decision-making. Whether you're in the classroom, an administrative office, or on an assessment committee, data about what students know and are able to do are critical for guiding changes that are needed in institutional policies and practices to improve student learning and success. Use this book to: Understand how and why student learning outcomes assessment can enhance student accomplishment and increase institutional effectiveness Shift the view of assessment from being externally driven to internally motivated Learn how assessment results can help inform decision-making Use assessment data to manage change and improve student success Gauging student learning is necessary if institutions are to prepare students to meet the 21st century needs of employers and live an economically independent, civically responsible life. For assessment professionals and educational leaders, *Using Evidence of Student Learning to Improve Higher Education* offers both a compelling rationale and practical advice for making student learning outcomes assessment more effective and efficient. Society's evolving perception of the role of and value of higher education relates to education's role in employment.

Employment is the most cited reason for school completion. The creation of peer

tutoring programs was to improve the academic performance of underprepared students. This study evaluated tutors registered in the Tutorial Training Course T-15 at Chabot College, Hayward, California. The Tutor Evaluation and Self-Assessment Tool (TESAT) was utilized to measure the tutors' performance. Thirty tutors performed the pre- and post-assessments. The instructor also evaluated the tutors with the TESAT, after the tutors' post-assessments to investigate the relationship between the tutors' and their instructor's perception of their tutorial skill. The tutors rated themselves as being proficient. There was a moderate correlation between the tutors' and the instructor's assessments. Attempts are currently being made to certify Chabot College's Tutorial Instructional Program with the College Reading and Learning Association. This certification in the field of tutorial education will assist the enhancement of the tutoring profession. Beyond the Impact National Academies Press

As the general population of Latinxs in the United States burgeons, so does the population of college-going Latinx students. With more Latinxs entering college, the number of Hispanic Serving Institutions (HSIs), which are not-for-profit, degree granting postsecondary institutions that enroll at least 25% Latinxs, also grows, with 523 institutions now meeting the enrollment threshold to become HSIs. But as they increase in number, the question remains: What does it mean to serve Latinx students? This edited book, Hispanic

Serving Institutions (HSIs) in Practice: Defining “Servingness” at HSIs, fills an important gap in the literature. It features the stories of faculty, staff, and administrators who are defining “servingness” in practice at HSIs. Servingness is conceptualized as the ability of HSIs to enroll and educate Latinx students through a culturally enhancing approach that centers Latinx ways of knowing and being, with the goal of providing transformative experiences that lead to both academic and non-academic outcomes. In this book, practitioners tell their stories of success in defining servingness at HSIs. Specifically, they provide empirical and practical evidence of the results and outcomes of federally funded HSI grants, including those funded by Department of Education Title III and V grants. This edited book is ideal for higher education practitioners and scholars searching for best practices for HSIs in the United States. Administrators at HSIs, including presidents, provosts, deans, and boards of trustees, will find the book useful as they seek out ways to effectively serve Latinx and other minoritized students.

Faculty who teach in higher education graduate programs can use the book to highlight practitioner engaged scholarship. Legislators and policy advocates, who fight for funding and support for HSIs at the federal level, can use the book to inform and shape a research-based Latinx educational policy agenda. The book is essential as it provides a framework that simplifies the complex phenomenon known as servingness. As HSIs become more significant in the U.S. higher education landscape, books that provide empirically based, practical examples of servingness are necessary.
