This special issue is a "how to" on overcoming the many systems-level challenges in K – 12 public education to implement effective reading interventions for the vast numbers of students reading below grade level. It emphasizes building researcher – practitioner partnerships, providing ongoing professional development for teachers, and removing institutional barriers to change as the keys to effective reading intervention. Interventions for the upper grades focus on the challenges of coaxing content-area teachers to learn new routines for building background knowledge, teaching academic vocabulary, and conducting discussions to foster critical reading and knowledge application. In the primary grades, interventions follow a multi-tiered system of support where enhanced classroom instruction is supported by small-group intervention for struggling readers. The volume also discusses the importance of training special educators to implement data-based individuation. This is the 154th volume in this Jossey-Bass series New Directions for Child and Adolescent Development. Its mission is to provide scientific and scholarly presentations on cutting edge issues and concepts in this subject area. Each volume focuses on a specific new direction or research topic and is edited by experts from that field.

Ana loves stories. She often makes them up to help her little brother fall asleep. But in her small village there are only a few books and she has read them all. One morning, Ana wakes up to the clip-clop of hooves, and there before her, is the most wonderful sight: a traveling library resting on the backs of two burros?all the books a little girl could dream of, with enough stories to encourage her to create one of her own. Inspired by the heroic efforts of real-life librarian Luis Soriano, award-winning picture book creators Monica Brown and John Parra introduce readers to the mobile library that journeys over mountains and through valleys to bring literacy and culture to rural Colombia, and to the children who wait for the BiblioBurro. A portion of the proceeds from sales of this book was donated to Luis Soriano's BiblioBurro program.
