For these reasons, "the shift from Indian to European dominance entailed important changes". Precontact ecosystem. Ecosystems are never actually inert, even without human interaction, and some

ecological changes are due to climatic changes, disease, drought, and natural fire. These changes are more negligible, and Cronon showed how the Native Americans and Europeans both distinctly

altered the environment.

Changes in the Land | A summary and analysis of William ...

William Cronon's Changes in the Land: Indians, Colonists, and the Ecology of New England interprets and analyzes the changing circumstances in New

England's plant and animal communities that occurred with the shift from Indian to European dominance. In his thesis Cronon claims, "the shift from

Indian to European dominance in New England entailed important changes—well known to historians—in the ways these peoples organized their lives, but it also involved fundamental ...

Initially, the Indians cleared land so that they could get enough food. However, they started engaging in selling timber and firewood, thus causing further degradation of forests. Deforestations led to

climatic changes, which had a significant impact on agriculture (Cronon 34). The Indians had a different perception of animals.
