How to Change the Transmission - Autobutler

Most manufacturers recommend that manual transmission fluid be changed every 30,000 to 60,000 miles. Under heavy-duty use, some manufacturers suggest changing transmission fluid every 15,000 miles. You know when Wile E. Coyote sees a tunnel but slams into the side of a mountain in the blink of an eye?

Changing Transmission From Auto To

An automatic transmission has many more differences from a manual transmission than you might expect Many people expect the base components of an automatic transmission to be the same only with some extra mechanics to change gears when needed and without a clutch pedal Converting An Automatic Transmission to Manual Components for Replacement – To [How to Replace a Transmission \(Full DIY Guide\) - YouTube](#)

Most automatic gearboxes will let you select between 'P' (for park), 'R' (reverse), 'N' (neutral) and 'D' (drive). Park should only be used when you're stopped and getting out of the car. This 'locks' the transmission, preventing it from rolling away (but you still need to apply the handbrake when parked as well).

Transmission oil change refers to replacing the old fluid in your car's transmission system with new fluid. Over time, transmission system fluid gets polluted due to dust and debris falling into it, as well as the natural wear and tear of the parts that it's supposed to be lubricating.
