Kerrigan Belmond has everything I don't have. A name that opens doors, more money than god, an Oxford education, and rumors that she's caught the eye of Spencer Byrd, the heir to one of England's most powerful aristocratic families. I'm an orphan, running from a tragedy I can't face. Being mistaken for her is flattering until her father arrives at my door with an indecent proposal. His daughter has fled her perfect life, and he wants me to step into her shoes until she can be coaxed back to her pedestal. The arrangement is simple. For one year, I will be Kerrigan Belmond. The perfect daughter. The charming socialite. The ideal future wife. For one year, I will do anything she would do. And for one year, I will keep the attention of Spencer at all costs. I can't say no, but as soon as I meet Spencer and his brother I realize the mistake I've made. To the outside world, the Byrds are London society and Spencer is the golden boy groomed to become prime minister. Behind closed doors, his family is as twisted and tangled as the web I'm walking into. Spencer demands loyalty. He expects discretion. And he's ready to claim the woman he's been promised in every way. Keeping him happy means I might lose more than a year of my life, but I can't turn down the proposition. Not with what the Belmonds have promised me in return. They say everyone has a price. I know mine. Ten million pounds.

An effective nonprofit sector can be a powerful force for change as well as a source of human inspiration. Three key levers can influence a nonprofit's effectiveness and, ultimately, its ability to have impact: solid strategy; access to the necessary funding, and talent that begins with leaders and senior managers. This book shares The Bridgespan Group's best thinking from the past 10 years on these key levers. The articles examine such essential topics as identifying nonprofit funding models, building stronger management teams, and creating plans to accomplish nonprofit goals.

Development Connections HarperCollins UK

Life on earth is characterized by three striking phenomena that demand explanation: adaptation—the marvelous fit between organism and environment; diversity—the great variety of organisms; and complexity—the enormous intricacy of their internal structure. Natural selection explains adaptation. But what explains diversity and complexity? Daniel W. McShea and Robert N. Brandon argue that there exists in evolution a spontaneous tendency toward increased diversity and complexity, one that acts whether natural selection is present or not. They call this tendency a biological law—the Zero-Force Evolutionary Law, or ZFEL. This law unifies the principles and data of biology under a single framework and invites a reconceptualization of the field of the same sort that Newton's First Law brought to physics. Biology's First Law shows how the ZFEL can be applied to the study of diversity and complexity and examines its wider implications for biology. Intended for evolutionary biologists, paleontologists, and other scientists studying complex systems, and written in a concise and engaging format that speaks to students and interdisciplinary practitioners alike, this book will also find an appreciative audience in the philosophy of science.
