All 1973 Chaparral trail sleds had purposely
built axial fan-cooled engines from Fuji
Heavy Industries. The five-port Fuji Heavies
with Capacitor Discharge Ignition (CDI) and
Teflon-coated piston rings were unusually
powerful across the board, including the 45
hp 440 that was the hottest choice for any
Chaparral trail sled in 1973.

Chaparral Snow Le Engines
December 1, 1995. As a prototype, the
original Chapparral was a rather revolutionary
machine. Built in 1966, the prototype
specified a fiberglass chassis, instead of the
conventional steel or aluminum. Chaparral
was a part of the Snowbirdie line, and also
included the Firebird. In late 1966, the
manufacturer moved the business to Grand
Junction, Colorado, and began operations as
the Powered Products Corporation.
Chaparral Snow Le Engines
The Chaparral 2D was equipped with a 327 cubic-
inch displacement (5.3-liter) aluminum alloy

Chevrolet engine producing 420 horsepower; the car
weighed only 924 kg. The 2E was based on the
Chevrolet-designed aluminum 2C chassis and
presented Hall's most advanced aerodynamic
theories to the racing world in 1966.
Chaparral Snow Le Engines
No snowmobile ever deserved this epitaph more
than the 1974 Chaparral SSX. The second liquid-
cooled snowmobile to hit the market — the Brut was
first — was not only ahead of most of the industry in
engine technology, but also in chassis construction
and equipment options.
