MATLAB Programming for Engineers - Stephen J.

Chapman ...

MATLAB® (short for MATrix LABoratory) is a

special-purpose computer pro-gram optimized to

perform engineering and scientific

calculations. It started life as a program

designed to perform matrix mathematics, but

over the years it has grown into a flexible

computing system capable of solving essentially

any tech-nical problem.

The sixth edition of Chapman's MATLAB Programming for Engineers teaches MATLAB as a technical programming language with an emphasis on problem-solving skills. Students learn how to write clean, efficient, and well-documented programs while gaining an understanding of the many practical functions of MATLAB. The first nine chapters support and provide a primary resource for today's introduction to programming and problem solving course for first-year engineering students.
