This book is primarily designed for students and teachers. This book contains more than 3813 questions from the core areas of MEDICAL PHYSIOLOGY. The questions are grouped chapter-wise. There are total 2 chapters, 11 sections and 3813+ MCQ with answers. This reference book provides a single source for multiple choice questions and answers in MEDICAL PHYSIOLOGY. One can use this book as a study guide, knowledge test questions bank, practice test kit, quiz book, trivia questions . . . etc. The strategy used in this

book is the same as that which mothers and grandmothers have been using for ages to induce kids in the family to sip more soup (or some other nutritious drink). The children are told that some cherries (their favourite noo- dles or cherries) are hidden somewhere in the bowl, and that serves as an incentive for drinking the soup. In joint families, by the time the children are old enough to know the trick played by their grandma, there is usually another group of kids ready to fall for it! They excite the kids, but the real nutrition lies not in the noodles but in the soup. The problems given in this book are like those noodles/cherries while solving all these problems are nutritious soup. Now it is your choice to drink the nutritious soups or not!!!.
