Introduction to Genetics Chapter 11 2. 11- 1 The Work of Gregor Mendel
Every living thing – plant or animal, microbe or human being – has a set of characteristics inherited from its parents
Since the beginning of recorded history, people have wanted to understand how that inheritance is passed from generation to generation
Section 11 – 1 The Work of Gregor Mendel
Chapter 11 Introduction to Genetics Section Review 11-1 Section Review 11-3
1. Mendel ' s principle of dominance states that
1. segregate
2. multiple alleles, multiple genes
3. b
4. c
5. d
6. a
7. some alleles are dominant and others are recessive.
2.

Chapter 11: Introduction to Genetics. **DO NOW** • Work in groups of 3 • Create a list of physical characteristics you have in common with your group. • Consider

things like eye and hair color, style/texture of gametes and helps account for the many hair, shape of nose/ears, and so on. • Why genetic variations observed in plants, animals, and other organisms.

do we all look different from each other?
Introduction to genetics (chapter 11) - wedgwood science

Genetics and Probability. Probability. is the likelihood that an event will occur. Scientists use probability to predict the outcomes of genetic crosses. If a coin is flipped once, the chance that it will be heads is $1/2$. If it is flipped three times in a row, the probability of flipping all heads is? $1/2 \times 1/2 \times 1/2 = \underline{\hspace{2cm}}$
