The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

As a postergirl, she is worried that there is a rumor that some of their customers have disappeared, and that ghoul had kidnapped them. Reimu, a priestess of Hakurei Shrine, sets out to investigate the case--what is behind all this?

Official Opinions and Communications of Franklin K. Lane CreateSpace

This is a complete update of the first edition of Level Crossing Methods in Stochastic Models, which was published in 2008. Level crossing methods are a set of sample-path based mathematical tools used in applied probability to establish reliable probability distributions. Since the basis for solving any applied probability problem requires a reliable probability distribution, Level Crossing Methods in Stochastic Models, Second Edition is a useful tool for all researchers working on stochastic application problems, including inventory control, queueing theory, reliability theory, actuarial ruin theory, renewal theory, pharmacokinetics, and related Markov processes. The second edition includes a new section with a novel derivation of the Beneš series for M/G/1 queues. It provides new results on the service time for three M/G/1 queueing models with bounded workload. It analyzes new applications of queues where zero-wait customers get exceptional service, including several examples on M/G/1 queues, and a new section on G/M/1 queues. Additionally, there are two other important new sections: on the level-crossing derivation of the finite time-t probability distributions of excess, age, and total life, in renewal theory; and on a level-crossing analysis of a risk model in Insurance. The original Chapter 10 has been split into two chapters: the new chapter 10 is on renewal theory, and the first section of the new Chapter 11 is on a risk model. More explicit use is made of the renewal reward theorem throughout, and many technical and editorial changes have been made to facilitate readability. Percy H. Brill, Ph.D., is a Professor emeritus at the University of Windsor, Canada. Dr. Brill is the creator of the level crossing method for analyzing stochastic models. He has published extensively in stochastic processes, queueing theory and related models, especially using level crossing methods.

This chapter is from Building Financial Models, widely acclaimed by accounting and finance professionals for its insight into determining a company's current value and projecting its future performance. Building on this tradition, the updated and expanded Second Edition helps readers develop a financial model, complete with entirely new material on discounted cash flow (DCF) modeling. Professionals will find this guide invaluable for both its practical, step-by-step approach to creating a core model and its broad coverage of model mechanics and foundational accounting and finance concepts.

Who Was Harriet Beecher Stowe? Independently Published

This research product provides a thorough examination of the question: "How can the Army assess, develop, and retain strategic thinkers?" Expert input from within and outside the military provide a variety of perspectives that highlight areas of convergence and divergence, as well as, exemplar techniques, processes and insights that inform and change the conceptualization and practice of strategic thinking in the military. This compendium does not provide the answer to all of the Army's strategic thinking challenges, but it does provide many possible avenues to explore with the goal of enhancing the Army's strategic thinking capabilities. Topics and subjects covered include: qualitative thinking, metacognitive ability, cognitive flexibility, abductive reasoning, system theory, critical thinking, visualization, PME curriculum, strategic theory. Section 1: Strategic Thinking - Big Picture * Chapter 1: The Identification and Education of U.S. Army Strategic Thinkers * Chapter 2: Strategic thinking: Requirements, Development, and Assessment * Chapter 3: Recruiting, Training, and Developing Strategic Thinkers * Section 2: Impact of Culture * Chapter 4: Developing Army Strategic Thinkers * Chapter 5: The Sociology of STRATEGY: Romancing the Image * Chapter 6: Creating an Organizational Culture to Support Strategic Thinking * Chapter 7: Implementing a Culture of Strategic Thinking in the U.S. Army * Section 3: Insights from Outside the Military * Chapter 8: Strategic Intuition in Army Training * Chapter 9: Creativity in Strategic Thinking * Chapter 10: Strategic Thinking. A Design Contribution * Section 4: Ways of Thinking * Chapter 11: Professional Military Education's Imperative of Linear/Nonlinear Thinking Style Balance for Improved Strategic Thinking * Chapter 12: A Science of Context: The Qualitative Approach as Fundamental to Strategic Thought * Chapter 13: The Genome Doodle of Strategic Thinking: Times, Epistemologies, and Narratives To begin understanding strategic thinking in the military, one must first have a basic sense of what strategic thinking is and what it is not. Examination of literature on strategic thinking does not lead to one common definition of strategic thinking. However, there are some identified common attributes of strategic thinking. Strategic thinking is built on a systems perspective, intent driven, hypothesis driven, intelligently opportunistic (capitalizing on new possibilities as the situation changes), and involves the ability to think in time (linking past, present, and future elements). The confusion about the definition of strategic thinking is exacerbated by the confounded concepts of strategic thinking, strategic planning, strategy, and the strategic thinker. In addition to the lack of common definition of strategic thinking, Heracleous notes that there is no common definition of strategic planning or common understanding of the relationship between strategic thinking and strategic planning. Liedtka outlines several differences between strategic thinking and strategic planning that include reliance on systems thinking, the role of measurement and control, and a focus on the outcome (strategy) versus the process. For the purpose of this compendium, we have focused extensively on concepts related to strategic thinking (cognitive processes) and the strategic thinker (characteristics of a person). This work does not extensively address the concepts of strategy (outcome) or strategic planning (programmatic, analytical process). Strategic thinking in the military comes with unique challenges and opportunities. It is different than strategic thinking in the private sector.

Born in Connecticut in 1811, Harriet Beecher Stowe was an abolitionist, author, and playwright. Slavery was a major industry in the American South, and Stowe worked with the Underground Railroad to help escaped slaves head north towards freedom. The publication of her book, Uncle Tom's Cabin, a scathing anti-slavery novel, fanned the flames that started the Civil War. The book's emotional portrayal of the impact of slavery captured the nation's attention. A best-seller in its time, Uncle Tom's Cabin sealed Harriet Beecher Stowe's reputations as one of the most influential anti-slavery voices in US history.
