communicative behavior (Chapter 11

...

The theory of evolution explains how life diversified after its origin and does not address the origin of life itself. Replicators A, B, C, and D become encapsulated by a membrane of fatty acids they produced. Building the membrane resulted in a great metabolic cost. The new membrane provides limited control over the new microenvironment, is fairly permeable, and frequently allows unneeded substances in while allowing newly made molecules to dissipate into the environment.

### **Chapter 11 The Evolution Of Populations Answer Key**

2020-11-09 In the Biblical account, Noah puts two of every animal on the Ark, but plants are left to fend for themselves or drown in the Flood, unmentioned. The old idea of the Great Chain of Being, with humans above animals and plants at the bottom, still governs the way we think and present information about the

world and its creatures.
