Bestseller! The Absolutely True  
Diary of a Part-Time Indian  
meets Jane the Virgin in this  
poignant but often laugh-out-  
loud funny contemporary YA  
about losing a sister and  
finding yourself amid the  
pressures, expectations, and  
stereotypes of growing up in a  
Mexican-American home. Perfect  
Mexican daughters do not go  
away to college. And they do  
not move out of their parents’  
house after high school  
graduation. Perfect Mexican  
daughters never abandon their  
family. But Julia is not your  
perfect Mexican daughter. That  
was Olga’s role. Then a tragic  
accident on the busiest street  
in Chicago leaves Olga dead and  
Julia left behind to reassemble  
the shattered pieces of her  
family. And no one seems to  
acknowledge that Julia is  
broken, too. Instead, her  
mother seems to channel her  
grief into pointing out every  
possible way Julia has failed.  
But it’s not long before Julia  
discovers that Olga might not  
have been as perfect as  
everyone thought. With the help  
of her best friend Lorena, and  
her first love, first

Julia is determined to find  
out. Was Olga really what she  
seemed? Or was there more to  
her sister’s story? And either

As with the first edition, this second edition of Living in a Microbial World is written for students taking a general microbiology course, or a microbiology-based course for non-science majors. The conversational style and use of practical, everyday examples make the essential concepts of microbiology accessible to a wide audience. While using this approach, the text maintains scientific rigor with clear explanations spanning the breadth of microbiology, including health, evolution, ecology, food production, biotechnology, and industrial processes. Each chapter contains a series of case studies based on microbiology in the news, in history, and in literature. There are questions at the end of each case study and the end of each chapter, as well as an online quiz with help on answering the questions. The text, questions, and cases have been updated to reflect the changing influence of microbiology in the world today, from the microbiome, to new disease outbreaks (Ebola and Zika) and antibiotic resistance, to new biotechnology tools (CRISPR-Cas).
