We are living in a culture still defined by unrealistic gender stereotypes and expectations. Despite much progress being made, women are still not, on the whole, treated as equals to men. Gender pay gaps, invisible labour, and outdated attitudes towards women (especially around sex and relationships) mean that many of us grow into adulthood shackled to our need to be nice, liked, and to please, at the detriment of our happiness and wellbeing. In Ditch the People Pleaser, you are going to explore four of the areas where you may find yourself people pleasing: life, relationships (including love and sex), work, and business and leadership. This book will help you to: 1) Undo the effects of people pleasing in your life so you ARE free from expectations + boxes. 2) Release the need to please so you are able to achieve deep connection, a sense of purpose + guidance from your inner knowing. 3) Break the cycle for your personal + spiritual growth AND for the young people in your life. You will be able to model and pass on a healthier way of being for the next generation. 4) Use techniques and practices that will transform the way you feel about being nice and acceptable. 5) Strengthen your relationship to yourself and the people in your life, expand into your work and contribute to compassionate change. Not only will you discover what the antidote is to people pleasing you will be supported with practical techniques and supportive resources to ditch the need to please right away. The Newbery Honor Book and New York Times Bestseller that is historical fiction with a hint of mystery about living at Alcatraz not as a prisoner, but as a kid meeting some of the most famous criminals in our history. Al Capone Does My Shirts has become an instant classic for all kids to read! Today I moved to Alcatraz, a twelve-acre rock covered with cement, topped with bird turd and surrounded by water. I'm not the only kid who lives here. There are twenty-three other kids who live on the island because their dads work as guards or cooks or doctors or electricians for the prison, like my dad does. And then there are a ton of murderers, rapists, hit men, con men, stickup men, embezzlers, connivers, burglars, kidnappers and maybe even an innocent man or two, though I doubt it. The convicts we have are the kind other prisons don't want. I never knew prisons could be picky, but I guess they can. You get to Alcatraz by being the worst of the worst. Unless you're me. I came here because my mother said I had to. In this inspirational and unflinchingly honest memoir, acclaimed author Reyna Grande describes her childhood torn between the United States and Mexico, and shines a light on the experiences, fears, and hopes of those who choose to make the harrowing journey across the border. Reyna Grande vividly brings to life her tumultuous early years in this “compelling...unvarnished, resonant” (BookPage) story of a childhood spent torn between two parents and two countries. As her parents make the dangerous trek across the Mexican border to “El Otro Lado” (The Other Side) in pursuit of the American dream, Reyna and her siblings are forced into the already overburdened household of their stern grandmother. When their mother at last returns, Reyna prepares for her own journey to “El Otro Lado” to live with the man who has haunted her imagination for years, her long-absent father. Funny, heartbreaking, and lyrical, *The Distance Between Us* poignantly captures the confusion and contradictions of childhood, reminding us that the joys and sorrows we experience are imprinted on the heart forever, calling out to us of those places we first called home. Also available in Spanish as *La distancia entre nosotros*.

The object of this book is to point out the most characteristic practical features of the federal system. Taking Congress as the central and predominant power of the system, its object is to illustrate everything Congressional. Everybody has seen, and critics without number have said, that our form of national government is singular, possessing a character altogether its own; but there is abundant evidence that very few have seen just wherein it differs most essentially from the other governments of the world. There have been and are other federal systems quite similar, and scarcely

any legislative or administrative principle of our Constitution was young even when that Constitution was framed. Contents: The House of Representatives The House of Representatives. Revenue and Supply The Senate The Executive

Presented in Large Print Format for easy reading this is Little Dorrit Book 2 Volume I The air there was charged with the scent of gathered grapes. Baskets, troughs, and tubs of grapes stood in the dim village doorways, stopped the steep and narrow village streets, and had been carrying all day along the roads and lanes. Grapes, split and crushed under foot, lay about everywhere. The child carried in a sling by the laden peasant woman toiling home, was quieted with picked-up grapes; the idiot sunning his big goitre under the leaves of the wooden chalet by the way to the Waterfall, sat Munching grapes; the breath of the cows and goats was redolent of leaves and stalks of grapes; the company in every little cabaret were eating, drinking, talking grapes. A pity that no ripe touch of this generous abundance could be given to the thin, hard, stony wine, which after all was made from the grapes!

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand.We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

Public procurement regulation in Africa is not widely researched. To address the shortage of scholarship in this area and to promote future research, this book analyses the law governing public procurement in a number of African systems and looks at key themes relevant to all African states. Part I discusses the regulatory regimes of nine African systems using a common framework, providing both a focused view of these African systems and an accessible comparative perspective. In Part II, key regulatory issues in public procurement that are particularly relevant in the African context are assessed through a comparative approach. The chapters consider the influence of international regulatory regimes (particularly the UNCITRAL Model Law on procurement) on African systems and provide insights into the way public procurement regulation is approached in Africa.
