Are there existing alternatives to corporate globalization? What are the prospects for and commonalities between communities and movements such as Occupy, the World Social Forum and alternative economies? Globalization Development and Social Justice advances the proposition that another globalization is not only possible, but already exists. It demonstrates that there are multiple pathways towards development with social justice and argues that enabling propositional agency, rather than oppositional agency such as resistance, is a more effective alternative to neoliberal globalization. El Khoury develops a theory of infraglobalization that emphasizes creative constitution, not just contestation, of global and local processes. The book features case studies and examples of diverse economic practice and innovative emergent political forms from the Global South and North. These case studies are located in the informal social economy and community development, as well as everyday practices, from prefigurative politics to community cooperatives and participatory planning. This book makes an important contribution to debates about the prospects for, and practices of, a transformative grassroots globalization, and to critical debates about globalization and development strategies. It will be of interest to students and scholars of international relations, globalization, social movement studies, political and economic geography, sociology, anthropology and development studies.

The New Landscape of Global Conflict Psychology Press
Spawned by the Cold War, NATO's existence was justified by Soviet threats to Western Europe. That *raison d'être* is long gone with the collapse of the Soviet Union and the end of the Cold War. Still NATO globalized relentlessly, moving from defensive to offensive under pretexts of humanitarianism, starting with Yugoslavia, then East Africa, Afghanistan, and most recently Libya, acting as an arm of the Pentagon. The danger to global equilibrium is a growing NATO being expanded further by American and British ambitions into a monster military force of world proportions, way beyond any Atlantic or European alliance. NATO expansion, intrusive military hardware, such as cyber technology/interference and the murderous capacity of drones is threatening North/South

peace. The creeping NATO expansion into Asia, the attempt to surround Russia, China and others can only end badly for the billions of human beings involved. The recent mini-US occupation of Australia, the interference in the ASEAN countries by US arms dealers and naval forces, the menacing presence of US aircraft carriers in the Indian Ocean, the South China Sea and the Strait of Malacca should remind historians of just why the Japanese considered it necessary to attack Pearl Harbor to end the US naval strangle hold imposed upon them. NATO as it expands today is absolutely not what the world of struggling economies and deprived populations require. It is nothing, but a negative force. "I hope this book will be read by very, very many who can turn this morbid fascination with violence into constructive conflict resolution."

Johan GALTUNG, Professor Emeritus of Peace Studies and Sociology at the University of Oslo "Mahdi Darius Nazemroaya's prolific writings give us a comprehensive understanding of the character of the military thrust and it's all out, no holds barred STRATEGIC plans and moves to invade, occupy and plunder the resources of nations, inflict unprecedented barbaric acts on the civil populations. He is one of the prescient thinkers and writers in contemporary times who deserves to be read and acted upon by people with a conscience and concern for humanity's future". VISHNU BHAGWAT, Admiral and Chief of the Naval Staff of India (1996-1998): Mumbai, India. "This book is a must read for those committed to reversing the tide of war and imperial conquest by the world's foremost military machine".

HUMAN BEHAVIOR IN THE MACRO SOCIAL ENVIRONMENT takes students to the heart of what social work is all about--helping them promote positive change by building upon the strengths of macro systems. Authors Karen Kirst-Ashman and Grafton Hull provide a comprehensive overview of human behavior in a macro setting, while citing real-world practice and case studies to support theories and their application. They focus on empowerment--encouraging communities, organizations and groups to promote change from the inside out. They also prompt students to think critically about how macro systems affect human behavior and shape social work practice. Aligned with current EPAS standards, the fifth edition offers up-to-date coverage of issues on environmental justice, cognitive restructuring, effective teams, organizational culture, faith-based social services and health care, among other topics. Readers find here a volume that applies positioning theory in order to

achieve a fuller and more in-depth understanding of conflict and its psychological resolution. Positioning theory is the study of the nature, formation, influence and ways of change of local systems of rights and duties as shared assumptions about them influence small scale interactions. This book will thus be of interest to social psychologists and anyone interested in the development and applications of positioning theory.

Colonial Encounters in a Time of Global Conflict, 1914 – 1918

Routledge

Digital War offers a comprehensive overview of the impact of digital technologies upon the military, the media, the global public and the concept of 'warfare' itself. This introductory textbook explores the range of uses of digital technology in contemporary warfare and conflict. The book begins with the 1991 Gulf War, which showcased post-Vietnam technological developments and established a new model of close military and media management. It explores how this model was reapplied in Kosovo (1999), Afghanistan (2001) and Iraq (2003), and how, with the Web 2.0 revolution, this informational control broke down. New digital technologies allowed anyone to be an informational producer leading to the emergence of a new mode of 'participative war', as seen in Gaza, Iraq and Syria. The book examines major political events of recent times, such as 9/11 and the War on Terror and its aftermath. It also considers how technological

developments such as unmanned drones and cyberwar have impacted upon global conflict and explores emerging technologies such as soldier-systems, exo-skeletons, robotics and artificial intelligence and their possible future impact. This book will be of much interest to students of war and media, security studies, political communication, new media, diplomacy and IR in general.

From Conflict Resolution to Peacebuilding Polity

Real People. Real Stories. Real Politics. Politics involves people, from many backgrounds, struggling to make their voices heard. Real people, telling their stories, reflect our ideals, choices, and collective experiences as a nation. In *American Government: Stories of a Nation*, author Scott Abernathy tunes in to these voices, showing how our diverse ideas shape the way we participate and behave, the laws we live by, and the challenges we face. Each chapter features real stories illustrating how the American political system is the product of strategies, calculations, and miscalculations of countless individuals. Students learn the nuts and bolts of political science through these compelling stories. Learning concepts in context is a tested learning technique that works to help ideas stick. The key concepts are memorable because they are tied to real politics, where students see political action and political choices shaping how institutions advance or impede the fulfillment of fundamental ideas. Not only will all students see themselves reflected in the pages, but they will come to understand that they, too, are strategic players in American politics, with voices that matter.

A Novel of the Next World War 2034 Springer

A definitive, transnational account of the military, political and cultural history of the First World War.

Terrorism, Ethnicity, Political Economy Pluto Press

With a diverse group of contributors from law, business and the social sciences, this book explores the line not only between order and disorder in global affairs, but also chaos and control, continuity and change, the core and the margins. The key themes include: global crises and the role of international law, norms and institutions; the challenge of pluralism to regulatory clarity; and critical assessments of taken-for-granted systems and values such as capitalism, centralised government, de-militarisation and the separation of powers. The book divides into two key parts. The first part, 'Conceptions', considers the diverse way in which order/disorder can be conceived in global governance and regulation. The second part, 'Case Studies', groups chapters around five topic areas: citizens, capitalism, conflict, crime and courts. The authors here build on the themes presented in the first part by embedding them within specific areas of international regulation, such as international criminal law, maritime law or finance regulation; jurisdictions and regions, such as Australia, Canada, China, Japan and South Asia; and subject-matter, such as water resources, citizenship, statelessness and public interest litigation. This blend of contemporary subject-matter, empirical studies, multi-disciplinary perspectives and academic theories provides a comprehensive analysis to current and emerging debates in the broader global community. In utilizing interdisciplinary studies to draw out common issues and alternative solutions, the book will appeal to a wide readership among academics and policy-makers.

The Balkan Wars and the Emergence of Modern Military Conflict, 1912-13 Springer Nature

This new collection critically examines the new global policy of 'good governance'. This catchphrase of aid policy and development thinking has been the subject of too little analysis to date. This book redresses the balance. It places the prefix 'good', and exactly what that means, under the microscope and examines the impact of neoliberal governance in a wide range of countries and territories, including Chile, Russia, Argentina and Indonesia.

International Relations and World Politics Gendering Global Conflict Toward a Feminist Theory of War

Laura Sjoberg positions gender and gender subordination as key factors in the making and fighting of global conflict. Through the lens of gender, she examines the meaning, causes, practices, and experiences of war, building a more inclusive approach to the analysis of violent conflict between states. Considering war at the international, state, substate, and individual levels, Sjoberg's feminist perspective elevates a number of causal variables in war decision-making. These include structural gender inequality, cycles of gendered violence, state masculine posturing, the often overlooked role of emotion in political interactions, gendered understandings of power, and states' mistaken perception of their own autonomy and unitary nature. Gendering Global Conflict also calls attention to understudied spaces that can be sites of war, such as the workplace, the household, and even the bedroom. Her findings show gender to be a linchpin of even the most tedious and seemingly bland tactical and logistical decisions in violent conflict. Armed with that information, Sjoberg undertakes the task of redefining and reintroducing critical readings of war's political, economic, and humanitarian dimensions, developing the beginnings of a feminist theory of war.

From Conflict Resolution to Peacebuilding is designed to introduce students to the key concepts of conflict resolution from a real world perspective. Covering both micro and macro sites of conflict, it offers ways to resolve conflicts at all levels from the interpersonal to the international. Starting with the notion that conflict is a fact of life but peacebuilding is not, this text analyzes protracted conflicts and "wicked problems" and also tackles the harder task of how to resolve conflict and build peace. Hauss' approach to peace and conflict studies is deeply personal and richly informed. Based on a strong research base and decades of experience in the field, the book offers new paradigms for considering the intractable conflicts in our world. Each chapter provides real world examples, stories, and cases that illustrating practical work at both the grass roots and elite levels. In a world where conflict seems to be on the rise at home and abroad, this text provides students with the tools to deal with conflict constructively in their daily lives, as citizens, and as future professionals in the growing field of conflict resolution. Features: Full suite of textboxes for study and application Key terms and references for further reading Conflict labs to help students apply concepts to real world situations "Out on a Limb" boxes ask readers to consider bold new ideas and paradigm shifts for analyzing conflict and building peace A dynamic range of open access instructor and student resources can be found at the author's website: www.chiphauss.info, including: Videos of interviews Curated web links Updates on breaking news Author's weekly blog Reviews of new books, documentaries, and other publications A discussion forum in which students and faculty members can interact with each other and with the author on issues of their choosing Regular video "office hours" with the author

Global Conflict Resolution Through Positioning Analysis SAGE Publications, Incorporated

The end of the Cold War has opened up the arena for increased attention to other lines of conflict, both in Europe and globally. Environmental disruption - by no means a new phenomenon - is a chief beneficiary of the shift in priorities in the public debate. The Scientific and Environmental Affairs Division of NATO has moved with the times and has defined environmental security as one of the priority areas for its cooperation with Central and Eastern Europe and countries of the former Soviet Union. Research on these issues is now thus very much a collaborative effort across former lines of division in Europe. The Introduction by Sverre Stub sets the tone: Our Future - Common, or None at All. The book reveals the very real risks associated with environmental degradation, whether of the land, waters or the oceans, and charts out previous disputes and points to the very real danger of violent conflict associated with the drying up of natural resources. The book ends with a section on Responses, which seeks to provide answers to the threats discussed in the preceding sections.
