This collection of essays by twenty-one distinguished American historians reflects on a peculiarly American way of

imagining the past. At a time when history-writing has changed dramatically, the authors discuss the birth and evolution of historiography in this country, from its origins in the late nineteenth century through its present, more cosmopolitan character. In the book's first part, concerning recent historiography, are chapters on exceptionalism, gender, economic history, social theory, race, and immigration and multiculturalism. Authors are Daniel Rodgers, Linda Kerber, Naomi Lamoreaux, Dorothy Ross, Thomas Holt, and Philip

Gleason. The three American centuries are discussed in the second part, with chapters by Gordon Wood, George Fredrickson, and James Patterson. The third part is a chronological survey of non-American histories, including that of Western civilization, ancient history, the middle ages, early modern and modern Europe, Russia, and Asia. Contributors are Eugen Weber, Richard Saller, Gabrielle Spiegel, Anthony Molho, Philip Benedict, Richard Kagan, Keith Baker, Joseph Zizak, Volker Berghahn, Charles Maier, Martin Malia, and Carol Gluck.

Together, these scholars reveal the unique perspective American historians have brought to the past of their own nation as well as that of the world. Formerly writing from a conviction that America had a singular destiny, American historians have gradually come to share viewpoints of historians in other countries about which they write. The result is the virtual disappearance of what was a distinctive American voice. That voice is the subject of this book.

Kenneth R. Bartlett applies his decades of experience teaching the Italian Renaissance to this beautifully illustrated overview. In his introductory Note to the Reader, Bartlett first explains why he chose Jacob Burckhardt's classic narrative to guide students through the complex history of the Renaissance and then provides his own contemporary interpretation of that narrative. Over seventy color illustrations, genealogies of important Renaissance families, eight maps, a list of popes, a timeline of events, a

bibliography, and an index are included.

The Renaissance and Reformation
Oxford University Press

The creator of the hit podcast series Tides of History and Fall of Rome explores the four explosive decades between 1490 and 1530, bringing to life the dramatic and deeply human story of how the West was reborn. In the bestselling tradition of The Swerve and A Distant Mirror, The Verge tells the story of a period that

marked a decisive turning point for both European and world history. Here, author Patrick Wyman examines two complementary and contradictory sides of the same historical coin: the world-altering implications of the developments of printed mass media, extreme taxation, exploitative globalization, humanistic learning, gunpowder warfare, and mass religious conflict in the long term, and their intensely disruptive consequences in the short-term. As told through the lives of ten real

people—from famous figures like Christopher Columbus and wealthy banker Jakob Fugger to a ruthless small-time merchant and a one-armed mercenary captain—The Verge illustrates how their lives, and the times in which they lived, set the stage for an unprecedented globalized future. Over an intense forty-year period, the seeds for the so-called "Great Divergence" between Western Europe and the rest of the globe would be planted. From Columbus's voyage across the Atlantic to Martin Luther's sparking the

Protestant Reformation, the foundations of our own, recognizably modern world came into being. For the past 500 years, historians, economists, and the policy-oriented have argued which of these individual developments best explains the West's rise from backwater periphery to global dominance. As The Verge presents it, however, the answer is far more nuanced. *Dances Over Fire and Water* Routledge

"This book has two virtues: it offers the broadest historical range of any study of ideas about welfare, and it uses the

analysis to show how social context and philosophical approach shape thinking about social provision and the good society," Peter Taylor-Gooby FBA, AcSS, Director ESRC Risk Programme "In this scholarly and highly readable book, Professor George traces the history of welfare thought back to the time of Plato and Aristotle. In doing so, he adds a new dimension to contemporary debates about the ends and means of social policy and our perceptions of its intellectual lineage." Professor Robert

Pinker This is the first book to examine the views of a number of theorists from ancient times to the 19th century on a range of welfare issues: wealth, poverty and inequality; slavery; gender issues and the family; child rearing and education; crime and punishment; and the role of the government vis-a-vis market provision. The book also looks at the values of the various theorists as well as their perception of human nature, for these tend to underpin their welfare views. The book will enable the reader to view

contemporary issues in historical context and will be essential reading for students of social policy, gender issues, community care, social work and sociology.

This is a sequel to Richard Viladesau's well-received study, *The Beauty of the Cross: The Passion of Christ in Theology and the Arts from the Catacombs to the Eve of the Renaissance*. It continues his project of presenting theological history by using art as both an independent religious or theological "text" and as a means of understanding the cultural context

for academic theology. Viladesau argues that art and symbolism function as alternative strands of theological expression sometimes parallel to, sometimes interwoven with, and sometimes in tension with formal theological reflection on the meaning of crucifixion and its role in salvation history. This book examines the two great revolutionary movements that gave birth to the modern West: the Renaissance and the Protestant Reformation. This period was eventful for both theology and art, and thus particularly fruitful for Viladesau's project. Using individual works of art, over sixty of which are reproduced in this book, to epitomize particular artistic and theological models, he explores the

contours of each paradigm through the works of representative theologians as well as liturgical, poetic, artistic, and musical sources. To name a few examples, the theologies of Savonarola, Luther, Calvin, and the Council of Trent, are examined in correlation to the new situation of art in the era of Fra Angelico, Leonardo, Michelangelo, Dürer, Cranach, and the Mannerists. In this book, Viladesau continues to deepen our understanding of the foremost symbol of Christianity. *A Short History of the Renaissance in Europe* The Peace of Westphalia *A Historical Dictionary* Drawing on recent research

by established and emerging scholars of sixteenth- and seventeenth-century art, this volume reconsiders the art and architecture produced after 1563 across the conventional geographic borders. Rather than considering this period a degraded afterword to Renaissance classicism or an inchoate proto-Baroque, the book seeks to understand the art on its own terms. By considering artists such as Federico Barocci and Stefano Maderno in Italy, Hendrick Goltzius in the Netherlands, Antoine Caron in France,

Francisco Ribalta in Spain, and Bartolomeo Bitti in Peru, the contributors highlight lesser known "reforms" of art from outside the conventional centers. As the first text to cover this formative period from an international perspective, this volume casts new light on the aftermath of the Renaissance and the beginnings of "Baroque." American Historians Interpret the Past Greenleaf Press (TN) A biography of Vittoria Colonna, confidante of Michelangelo, scion of one of the most powerful families of her era, and a pivotal figure in the Italian Renaissance

Ramie Targoff 's Renaissance Woman tells of the most remarkable woman of the Italian Renaissance: Vittoria Colonna, Marchesa of Pescara. Vittoria has long been celebrated by scholars of Michelangelo as the artist 's best friend—the two of them exchanged beautiful letters, poems, and works of art that bear witness to their intimacy—but she also had close ties to Charles V, Pope Clement VII and Pope Paul III, Pietro Bembo, Baldassare Castiglione, Pietro Aretino, Queen Marguerite de Navarre, Reginald Pole, and Isabella d ' Este, among others. Vittoria was the scion of an immensely powerful family in Rome during that city 's most explosively creative era. Art and literature

flourished, but political and religious life were under terrific strain. Personally involved with nearly every major development of this period—through both her marriage and her own talents—Vittoria was not only a critical political actor and negotiator but also the first woman to publish a book of poems in Italy, an event that launched a revolution for Italian women 's writing. Vittoria was, in short, at the very heart of what we celebrate when we think about sixteenth-century Italy; through her story the Renaissance comes to life anew. Dynasties McDougal Littell/Houghton Mifflin This book examines the ways in which spaces and places of

solitude were conceived of, imagined, and represented in the late medieval and early modern periods. It explores the spatial, material, and affective dimensions of solitude, which have so far received only scant scholarly attention.

Visser breaks ground in three ways. He grounds Augustine's theological reception in the history of reading and the material culture of books and manuscripts. He does not

confine his examination to particular confessional parties, and he provides insight into the nature of intellectual authority in the early modern period.
