1 Essentials of Anatomy and Physiology, 9e (Marieb) Chapter 13 The Respiratory System Short Answer Figure 13.1 Using Figure 13.1, identify the following:

### 13. The Respiratory System | Nurse Key

- Air passes through the nose, mouth, pharynx, larynx, and trachea and then into the lungs (Figure 13-1).
- The nasal cavity is lined with mucous membrane that warms and moistens the air as it passes through; moisture protects the cilia.
- The mucous membrane secretes mucus, which traps dust particles and bacteria.

### Quia - Chapter 13- The Respiratory System

The most important birth defects of the respiratory system are cleft palate and cystic fibrosis. The lungs continue to mature until young adulthood. During youth and middle age, most respiratory system problems are a result of external factors, such as infections and substances that physically block respiratory passageways.
