How to Teach Maths challenges everything you thought you knew about how maths is taught in classrooms. Award-winning author Steve Chinn casts a critical eye over many of the long-established methods and beliefs of maths teaching. Drawing from decades of classroom experience and research, he shows how mathematics teaching across the whole ability range can be radically improved by learning from the successful methods and principles used for the bottom quartile of achievers: the outliers. Chinn guides readers through re-adjusting the presentation of maths to learners, considering learners' needs first, and explains the importance of securing early learning to create a conceptual foundation for later success. This highly accessible book uses clear diagrams and examples to support maths teachers through many critical issues, including the following: The context of maths education today Topics that cause students the most difficulty Effective communication in the mathematics classroom Addressing maths anxiety The perfect resource for maths teachers at all

levels, this book is especially useful for those wanting to teach the foundations of mathematics in a developmental way to learners of all ages and abilities. It has the potential to change the way maths is taught forever.

The Skill Builders help students prepare for the specific skills and subjects tested on an exam. They are designed to tutor students on every skill level, from high school to graduate or professional school. Keys are included to show students which chapters to study for specific tests. REA's United States History Builder reviews all United States history questions covered on standardized tests such as the AP U.S. History, CLEP, GRE History, and the SAT II: American History and Social Studies exams. Topics covered range from the Colonial period to Watergate, Carter, and the New Conservatism.
