Human service organizations (HSOs) are faced with challenges and opportunities ranging from improving effectiveness and efficiency to advancing diversity, equity,

and inclusion. However, organizational change can be a difficult process and does not occur without a catalyst. *Organizational Change for the Human Services* presents an evidence-based conceptual framework for planning and implementing change within HSOs. This book outlines the process for organizational change from identifying a problem to following a strategy for success. Thomas Packard presents discussions on various methods such as team building, employee surveys, cultural change, organization redesign, and intrapreneurship. Case examples demonstrate how individuals can put theory into practice within their organizations. Written for current and future HSO leaders, this book delves into the tactics and change methods that will help guide individuals to enact change within their organizations. Packard has created an invaluable resource for HSO leaders who aspire to provide the best services and care for the clients and communities they serve.

The Roles of Technology and Globalization in Educational Transformation Routledge
THE STORY: The action of the play is comprised of a series of varied, imaginatively conceived episodes, which blend into a powerful and stirring mosaic. The opening scene is a hiring hall where a union leader (obviously in the pay of the bosses) is trying to convince a committee of workers (who are waiting for their leader, Lefty, to arrive) not to strike. This is followed by a moving confrontation between a discouraged taxi driver, who cannot earn enough to live on, and his angry wife, who wants him to show some backbone and stand up to his employer; a

revealing scene between a scheming boss and the young worker who refuses to spy on his fellow employees; a sad/funny episode centering on a young cabbie and his would-be bride, who lack the wherewithal to get married; a disturbing scene involving a senior doctor and the underpaid young intern (a labor activist) whom the doctor has been ordered to discharge; and, finally, a return to the union hall where the workers, learning that Lefty has been gunned down by the powers-that-be, resolve at last to stand up for their rights and to strike-and to stay off their jobs until their grievances are finally heard and acted upon by those who have so cynically exploited and misused them.

Businesses worldwide are faced with major challenges related to the progressive (and many times unavoidable) incorporation of information technologies into their processes. Often, organizations don't suitably react to the new requirements of these technologies, resulting in outdated policies, practices, and strategies. Human Resource Management in the Digital Economy: Creating Synergy between Competency Models and Information is a reference for both practitioners and academics that demonstrates how to implement e-

management and competency models in companies. This book offers perspectives on the impact of integrated e-human resource policies and provides recommendations for addressing the shift from traditional human resource policies to new perspectives.

Biliteracy, or the development of reading, writing, speaking, listening, and thinking competencies in more than one language, is a complex and dynamic process. The process is even more challenging when the languages used in the literacy process differ in modality. Biliteracy development among deaf students involves the use of visual languages (i.e., sign languages) and auditory languages (spoken languages). Deaf students' sign language proficiency is strongly related to their literacy abilities. The distinction between bilingualism and multilingualism is critical to our understanding of the underserved, the linguistic deficit, and the underachievement of deaf and hard of hearing (D/HH) immigrant students, thus bringing the multilingual and immigrant aspect into the research on deaf education.

Multilingual and immigrant students may face unique challenges in the course of their education. Hence, in the education of D/HH students, the intersection of issues such as biculturalism/multiculturalism, bilingualism/multilingualism, and immigration can create a dilemma for teachers and other stakeholders working with them. Deaf Education and Challenges for Bilingual/Multilingual Students is an essential reference book that provides knowledge, skills, and dispositions for teaching multicultural, multilingual, and immigrant deaf and hard of hearing students globally and identifies the challenges facing the inclusion needs of this population. This book fills a current gap in educational resources for teaching immigrant, multilingual, and multicultural deaf students in learning institutions all over the world. Covering topics such as universal design for learning, inclusion, literacy, and language acquisition, this text is crucial for classroom teachers of deaf or hard of hearing students, faculty in deaf education programs, language instructors, students, pre-service teachers, researchers, and academicians.

Twenty years is a long time in the life of a science. While the historical roots of psychology have not changed since the first edition of this book, some of the offshoots of the various theories and systems discussed have been critically reexamined and have

undergone far-reaching modifications. New and bold research has led to a broadening of perspectives, and recent developments in several areas required a considerable amount of rewriting. I have been fortunate in the last fifteen years to have worked with about 2,000 psychologists and other behavioral scientists who contributed to several collected volumes I have edited. As the editor-in-chief of the International Encyclopedia of Psychiatry, Psychology, Psychoanalysis and Neurology, I have had the privilege of reading, scrutinizing, and editing the work of 1,500 experts in psychology and related disciplines. In addition, I have written several books and monographs and over one hundred scientific papers. Armed with all that experience, I have carefully examined the pages of the first edition. Chapter 8 required substantial rewriting and several new sections have been added to other chapters: "Current Soviet Psychology" (Chapter 2, Section 7); "New Ideas on Purposivism" (Chapter 5, Section 4); "Recent Developments in the Sociological School of Psychoanalysis" (Chapter 9, Section 4); and "Present Status of Gestalt Psychology" (Chapter 12, Section 4). Chapter 15 was omitted, and two new chapters were added: Chapter 14 ("Humanistic Psychology") and Chapter 16 ("Selected Research Areas").

The contemporary conflict scenarios are beyond the reach of standardized approaches to conflict resolution. Given the curious datum that culture is implicated in nearly every conflict in the world, culture can also be an important aspect of efforts to transform destructive conflicts into more constructive social processes. Yet, what culture is and how culture matters in conflict scenarios is contested and regrettably unexplored. The Handbook of Research on the Impact of Culture in Conflict Prevention and Peacebuilding is a critical publication that examines cultural differences in conflict resolution based on various aspects of culture such as morals, traditions, and laws. Highlighting a wide range of topics such as criminal justice, politics, and technological development, this book is essential for educators, social scientists, sociologists, political leaders, government officials, academicians, conflict resolution practitioners, world peace organizations, researchers, and students.

Teenage pregnancy is a public health concern that is growing more prevalent in both developed and developing countries. Understanding the problems of teenage motherhood and suggesting relevant preventive strategies and interventions can help break the cycle of poverty, poor education, and risky behaviors that can lead to health and child welfare issues. Socio-Cultural Influences on Teenage Pregnancy and Contemporary Prevention Measures is an essential reference source that discusses the causes and factors responsible for early motherhood, as well as the mental and psychological outlooks

of teen mothers. Featuring research on topics such as minority populations, family dynamics, and sex education, this book is ideally designed for healthcare students, medical professionals, practitioners, nurses, and counselors seeking coverage on the issues, reasons, and outcomes of teenage pregnancy, as well as preventive strategies to combat teenage motherhood.

Handbook of Research on the Impact of Culture in Conflict Prevention and Peacebuilding IGI Global

This book delves into one of the greatest riddles perplexing modern science: "Why are humans so smart?" In a format understandable even by the non-expert, the author investigates the origins of human intelligence, starting with classical Darwinian concepts. Thus, the strengths and beauty of natural selection are presented with many examples taken from natural history. Common criticisms of Darwin, from scientists and non-scientists alike, are confronted and shown to be either inconclusive or outright false. The author then launches into a discussion of human intelligence, the most important feature of human evolution, and how it cannot be fully explained by mutational selection. Modern humans are smarter than what is demanded by our evolutionary experience as hunter-gatherers. The difficulty lies in the inability of natural selection to answer the following question: how can a complex set of genes, controlling expensive traits with little immediate benefit, come into permanent existence within a short time period in every member of a small population (which was dispersed and geographically isolated over a huge planet) which had a low reproductive output and a low mutation rate? The book concludes with a speculative epigenetic theory of intelligence that does not require DNA mutations as a source of evolution. Although the book is comprehensible by anyone with a college education, this last section in particular should intrigue both layman and expert alike.

What is the Mediterranean? The perception of the Mediterranean leans equally on the nature, culture, history, lifestyle, and landscape. To approach the question of identity, it seems that we have to give importance to all of these. There is no Mediterranean identity, but Mediterranean identities. Mediterranean is not about the homogeneity and uniformity, but about the unity that comes from diversities, contacts, and interconnections. The book tends to embrace the environment, society, and culture of the Mediterranean in their multiple and unique interconnections over the millennia, contributing to the better understanding of the essential human-environmental interrelations. The choice of 17 chapters of the book, written by

a number of prominent scholars, clearly shows the necessity of the interdisciplinary approach to the Mediterranean identity issues. The book stresses the most serious concerns of the Mediterranean today - threats to biodiversity, risks, and hazards - mostly the increasing wildfires and finally depletion of traditional Mediterranean practices and landscapes, as constituent parts of the Mediterranean heritage.

Handbook of Research on Multicultural Perspectives on Gender and Aging IGI Global

Consumer culture influences virtually all activities within modern societies and has become an important area of study for businesses. Logical analysis of consumer behavior is difficult as humans have different reasons for repeatedly buying products they need or want, and it is challenging to follow why they buy unneeded or unwanted products regularly. Without a comprehensive understanding of consumer culture as the basis, market discussions become empty and produce little insight into the power consumers hold in affecting other individuals and society. Multifaceted Explorations of Consumer Culture and Its Impact on Individuals and Society provides emerging research from different perspectives on the basis and ramifications of consumer culture, as well as how it affects all aspects of the lives of individuals. While providing a platform for exploring interpersonal interactions and issues related to ethics in marketing, readers will gain valuable insight into areas such as consumer vs. producer mentality, the effects of consumerism on developing countries, and the consequences of consumerism. This book is an important resource for marketing professionals, business managers, sociologists, students, academicians, researchers, and consumer professionals.

This book aims to present an overview of Chinese, Japanese and Korean modern management styles. The cultures of China, Japan and Korea are influenced by Confucianism, Daoism and Buddhism. As such, there are some basic similarities in their management styles. As business operations become more internationalised, the management styles among Chinese, Japanese and Korean companies have blurred the lines of distinction between Western and Eastern cultures. The need for Western managers to adapt to Asian way of doing business, and likewise for Asian companies to understand Western business practices, means that managers have to bridge the gaps and adopt the best management practices containing both Western and Eastern elements. Unlike the traditional approach of setting clear differentiation between Western and Eastern cultures, this book looks at Oriental management from a modern perspective, that is, the fusion of Western and Eastern management styles.

By using a multifaceted approach to understanding modern Oriental management, the author stresses the complexities of the business environment in China, Japan and Korea. He suggests that Western theories of management are applicable to Eastern cultural context with some adaptations to the local environment. The author also offers valuable insights into the management styles of Oriental managers by providing a critical perspective of their thought processes in simple yet highly relevant illustrations of models and frameworks. This book is recommended for those who are interested in attaining a deeper knowledge of Oriental management practices.
